Montachusett Regional Planning Commission

FFY 2019-2023 TRANSPORTATION IMPROVEMENT PROGRAM

MONTACHUSETT METROPOLITAN PLANNING ORGANIZATION

MPO ENDORSED

May 16, 2018

Prepared by the MONTACHUSETT REGIONAL PLANNING COMMISSION FFY 2018 PROGRAM YEAR

Prepared in cooperation with the Massachusetts Department of Transportation and the U.S. Department of Transportation. The views and opinions of the Montachusett Regional Planning Commission expressed herein do not necessarily state or reflect those of the Massachusetts Department of Transportation or the U.S. Department of Transportation.

FFY 2019-2023 TRANSPORTATION IMPROVEMENT PROGRAM

MONTACHUSETT METROPOLITAN PLANNING ORGANIZATION

MPO Endorsed May 16, 2018

Prepared in cooperation with the Massachusetts Department of Transportation and the U.S. Department of Transportation. The views and opinions of the Montachusett Regional Planning Commission expressed herein do not necessarily state or reflect those of the Massachusetts Department of Transportation or the U.S. Department of Transportation.

The Montachusett MPO and the MRPC fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. The Montachusett MPO operates without regard to race, color, national origin, English Proficiency, ancestry, creed, income, gender, age and/or disability. Any person who believes him/herself or any specific class of persons, to be subject to discrimination prohibited by Title VI may by him/herself or by representative file a written complaint with the MRPC or the MMPO. Complaints are to be filed no later than 180 days from the date of the alleged discrimination. Please contact Glenn Eaton at 978-345-7376 ext. 310 for more information.

MONTACHUSETT METROPOLITAN PLANNING ORGANIZATION ENDORSEMENT OF THE 2019 – 2023 TRANSPORTATION IMPROVEMENT PROGRAM

Whereas, the Montachusett Metropolitan Planning Organization (MMPO) has completed its review in accordance with 23 CFR Part 450 Section 324 (Development and content of the Metropolitan Transportation Plan) and 23 CFR Part 450 Section 326 (Transportation Improvement Program: General) and hereby certifies that the FFY 2019-2023 TIP is financially constrained and that it conforms to the Montachusett 2016-2040 Regional Transportation Plan. Based on the results of the review and analyses, the Montachusett 2016-2040 Regional Transportation Plan and FFY 2019-2023 TIP are consistent with the air quality goals of, and in conformity with, the Massachusetts State Implementation Plan;

Therefore, the Committee of Signatories representing the Montachusett Metropolitan Planning Organization (MMPO) by a majority vote hereby endorses the Montachusett Region FFY 2019-2023 Transportation Improvement Program (TIP).

MPO SELF CERTIFICATION COMPLIANCE STATEMENT

This will certify that the Comprehensive, Continuing, Cooperative Transportation Planning Process for Fiscal Years 2018 and 2019 in the Montachusett Metropolitan Planning Organization is addressing major issues facing the region and is being conducted in accordance with all applicable requirements including:

- 1. 23 USC Section 134, 49 U.S.C. 5303, and this subpart;
- 2. In nonattainment and maintenance areas, sections 174 & 176 (c) & (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) & (d)) and 40 CFR part 93;
- 3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- 4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- 5. Section 1101 (b) of the Fixing America's Surface Transportation Act (FAST Act), (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- 6. 23 CFR 230, regarding the implementation of an Equal Employment Opportunity Program on Federal and Federal-Aid construction contracts;
- 7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR Parts 27, 37 and 38;
- 8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- 9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- 10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.
- 11. Anti-lobbying restrictions found in 49 U.S.C. Part 20. No appropriated funds may be expended by a recipient to influence or attempt to influence an officer or employee of any agency, a Member of Congress, in connection with the awarding of any Federal contract.

The Committee of Signatories representing the Montachusett Metropolitan Planning Organization (MMPO) by a majority vote hereby endorses the Self Certification Compliance Statement for the Montachusett MPO.

310 CMR 60.05: Global Warming Solutions Act Requirements for the Transportation Sector and the Massachusetts Department of Transportation

Self-Certification Compliance Statement for Metropolitan Planning Organizations

This will certify that the FFY 2019-2023 Transportation Improvement Program_for the Montachusett Metropolitan Planning Organization is in compliance with all applicable requirements in the State Regulation 310 CMR 60.05: Global Warming Solutions Act Requirements for the Transportation Sector and the Massachusetts Department of Transportation. The regulation requires the Metropolitan Planning Organizations (MPOs) to:

- 1. 310 CMR 60.05, 3(b)(1)(a): Evaluate and track the GHG emissions and impacts of RTPs and TIPs;
- 2. 310 CMR 60.05, 3(b)(1)(b): In consultation with MassDOT, develop and utilize procedures to prioritize and select projects in RTPs, TIPs, and STIPs based on factors that include GHG emissions and impacts;
- 3. 310 CMR 60.05, 3(b)(1)(c): Quantify net GHG emissions and impacts resulting from the projects in RTPs and TIPs and have made efforts to minimize GHG emissions and impacts;
- 4. 310 CMR 60.05, 3(b)(1)(d): Determine in consultation with MassDOT that the appropriate planning assumptions used for GHG emissions modeling are consistent with local land use policies, or that local authorities have made documented and credible commitments to establishing such consistency;
- 5. 310 CMR 60.05, 4(a)(2)(e): Develop public consultation procedures for GHG reporting and related GWSA requirements consistent with current and approved regional public participation plans;
- 6. 310 CMR 60.05, 4(c): Prior to making final endorsements on the RTPs, TIPs, STIPs, and projects included in these plans, MassDOT and the MPOs shall include the GHG Assessment and information on related GWSA activities in RTPs and TIPs and provide an opportunity for public review and comment on the RTPs, and TIPs.
- 7. 310 CMR 60.05, 6(a): After a final GHG assessment has been made by MassDOT and the MPOs, MassDOT and the MPOs shall submit MPO-endorsed RTPs and TIPs within 30 days of endorsement to the Department for review of the GHG assessment.

INTRODUCTION

This document is the product of a comprehensive, continuing and cooperative effort to improve and sustain the transportation systems of the Montachusett Region. The decisions and priorities established within are derived and shaped through outreach to and input from local officials, the Montachusett Joint Transportation Committee (MJTC), the Montachusett Regional Transit Authority (MART), the Montachusett Regional Planning Commission (MRPC), the Massachusetts Department of Transportation (MassDOT), the MassDOT Highway Division and any and all interested individuals, organizations and stakeholders in the public at large. Throughout the development and decision-making process, all individuals in the Region are strongly encouraged to participate in the transportation planning process, voice any opinions or concerns and help shape and guide the development of this document.

TRANSPORTATION IMPROVEMENT PROGRAM (TIP) DEVELOPMENT PROCESS

Requirement for Transportation Improvement Program (TIP)

The TIP is required under Federal Regulations issued jointly by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). This TIP is a prioritized listing of transportation projects proposed for implementation for the Montachusett Region during the future five federal fiscal years. This time period is broken down into the coming year (Year 1 Element) and the following four years (Year 2 through Year 5). The fiscal years are project specific where possible. The TIP projects are also identified by funding category so that where necessary priorities may be established for projects within each funding program. Unless otherwise noted, the agency responsible for implementing highway projects is the Massachusetts Department of Transportation Highway Division and, for transit projects, the Montachusett Regional Transit Authority. The reader will note that some of the same projects may be found again in this year's Year 1 Element because they have been delayed by various problems in their design or environmental requirements, while other projects found in last year's TIP have been removed due to implementation.

Procedures for Development of TIP

The MRPC staff annually develops the TIP project listing. Sources used include the MassDOT's Project Information System, MassDOT Highway Division Districts 2 and 3, local officials, the Montachusett Joint Transportation Committee (MJTC), the Regional Transportation Plan (RTP), the Montachusett Metropolitan Planning Organization (MMPO), regional stakeholders, the general public and Transportation Control Measures (TCMs) identified in the Transportation Element of the State Implementation Plan (TESIP).

The local planning process conforms to the private enterprise requirements of the FTA Act, Section 5309, Section 5303 and Section 5307. Specifically, this is demonstrated in the FTA Section 5307 Urban Area Formula Program. Funding from each of these grants is supplied to private transportation providers who provide, under contract, mass transportation services to the Montachusett Regional Transit Authority and to various communities to through Council on Aging services. The private operators are Management of Transportation Services, Inc., Management of Transportation Services Gardner, Inc., Dial-A-Mart Services, Inc., and Management of Transportation Services Gardner, Athol Division. Input from all the providers is utilized in the planning process.

Public Participation Procedures

The Montachusett Public Participation Program (PPP) establishes the procedures utilized to ensure "opportunities for any and all interested individuals to participate early and often in the transportation decision making process." The PPP also seeks to outline "the process that the MMPO will use to reach out to persons identified under the regulations/laws of Title VI, Environmental Justice (EJ), Limited English Proficiency (LEP), Americans With Disabilities Act (ADA) and as well as any other traditionally underrepresented population." The MRPC recently amended the PPP in order to change the length for public review and comment periods for the TIP, the Unified Planning Work Program (UPWP), the Regional Transportation Plan (RTP) and other major transportation related documents from 30 days to 21 days. This change allows for a more consistent review process and schedule while still providing ample opportunity for public involvement. After a 45-day public review and comment period, the amended PPP was endorsed by the MPO on March 15, 2017 and became effective as of this date. The PPP also includes provisions for the MPO to reduce the comment period for required documents to a minimum of 10 days under extraordinary circumstances. The PPP is "considered a living document that will change, grow and adapt in order to help the MMPO sustain its work to engage diverse community members throughout its Region. Therefore, the MMPO will modify its public participation methods and activities over time, based on ideas and feedback from community members and the MMPO's evaluation of its public participation process and effectiveness." Future updates and/or revisions will also be undertaken as requirements and/or changes are identified due to the passage of the FAST Act, and any future continuing resolutions or federal authorizing legislation.

In conformance with the amended PPP, the draft TIP is distributed for a 21-day public review and comment period. Following completion of the 21-day review period, any comments or issues received are addressed and reflected in the final TIP. This document is then reviewed by the MJTC/MRPC and MMPO and is recommended for endorsement by the Montachusett Metropolitan Planning Organization (MMPO) at a subsequent MMPO meeting.

The fully endorsed TIP is then distributed to Federal, State and local agencies and groups, including FTA, FHWA, the Environmental Protection Agency (EPA) and the Department of Environmental Protection (DEP), again, in conformance with the PPP.

Throughout the development procedure, the Montachusett Transportation Improvement Program (TIP) is compiled in accordance with Title 23 CFR Section 450.324 and 310 CMR 60.03(6)h that requires that the TIP development provide an adequate opportunity for public review and comment. As such, during the TIP development process, a memo announcing the commencement of the TIP was distributed to members of the MPO outreach list including those identified as serving the Title VI and EJ populations. The memo was also translated into Spanish based on our current LEP (Limited English Proficiency) Plan. These memos identified upcoming times and dates where the TIP was to be discussed. It also invited comments and input from all potentially impacted populations including those of Title VI and EJ. These memos were also published to the MRPC webpage. For a listing of the groups contacted as well as a list of meeting dates, please refer to the Coordination/Consultation Process section later in this document.

The Montachusett Regional Transit Authority, a FTA Section 5307/5310/5339 applicant, has consulted with the Montachusett Regional Planning Commission and concurs that the public involvement process adopted by the MPO for the development of the TIP satisfies the public hearing requirements that pertain to the development of the "Program of Projects" (POP) for regular Section 5307, Urbanized Area Formula Program, grant applications including the provision for public notice and the time established for public review and comment.

For FTA projects that are not routine, i.e. applications that require an environmental assessment or an environmental impact statement, the public involvement provided for herein for the TIP review is not sufficient. Additional public involvement, as presented in the joint FHWA/FTA environmental regulations, 23 CFR part 771 will be required by FTA for grant approval.

Coordination/Consultation Process

During the development process of the TIP, the MRPC coordinates with:

- MassDOT Highway Division Districts 2 and 3;
- MassDOT Office of Transportation Planning;
- Montachusett Regional Transit Authority;
- Montachusett Metropolitan Planning Organization;
- Montachusett Joint Transportation Committee.

In addition to specific meetings scheduled for TIP project and Transportation Evaluation Criteria (TEC) review, public meetings of the MJTC and MRPC provide opportunity for input from the general public and interested groups. Notices related to the TIP development and the public comment periods are disseminated to members of the MRPC Transportation Mailing Matrix in accordance with the Montachusett Public Participation Plan (PPP) (MPO endorsed May 25, 2016 and Amended March 25, 2017).

As part of this outreach process, efforts to ensure meeting the requirements of Environmental Justice and Title VI of the 1964 Civil Rights Act are continually examined. This includes the development of a Limited English Proficiency (LEP) Access Plan (MPO Adopted September 2013), translation of memos and certain documents into other languages (based upon the LEP, this is currently done for Spanish), the availability of translation tools for the MRPC website and the inclusion of advocates for special groups in the MJTC membership. MRPC staff maintains a continual review and update process of electronic contact information, i.e. email addresses, in order to correct issues such as broken or non-existent addresses and personnel changes. This electronic mailing list comprises the major PPP distribution list for transportation issues and notices. The update of this electronic mailing list remains an important aspect of our public participation process.

Members of the outreach list include but are not limited to:

Public/Private Groups - Montachusett Joint Transportation Committee (MJTC) Members; Montachusett Regional Planning Commission (MRPC) Members; Montachusett Metropolitan Planning Organization (MMPO) Members; Mayors; Boards of Selectmen; Planning Departments; Planning Boards; City and Town Clerks; Town Administrators; Police Departments; Fire Departments; Public Work Departments; Conservation Commissions; Congressmen; Senators; State Senators and Representatives ; Local Media; Libraries; Councils on Aging; Private Transportation Providers; Regional Transit Authority; Chambers of Commerce; City Councilors; Environmental Protection Agency; Department of Environmental Management; State and Federal Agencies; Housing Authorities; School Districts; Hospitals and Medical Centers; Trail Advocacy Groups and Organizations; Community Development Corporations; and Emergency Management Agencies and Directors.

Special Interest Groups - Montachusett Opportunity Council; Local Transit Union; Cleghorn Neighborhood Center; Spanish American Center; MA Rehab Commission; Fitchburg Spanish Council; Local Community Development Corporations; Airport Managers; Neighborhood Groups; Community Action Groups

The FFY 2019 – 2023 TIP has been or will be discussed at the following scheduled meetings:

- January 10, 2018 MJTC Meeting
- January 11, 2018 MRPC Meeting
- January 24, 2018 Montachusett MPO Meeting
- February 1, 2018 MRPC Meeting

- February 13, 2018 TIP Readiness Day
- February 14, 2018 MJTC Meeting
- February 21, 2018 Montachusett MPO Meeting
- March 1, 2018 MRPC Meeting
- March 14, 2018 MJTC Meeting (Meeting Cancelled Due to Weather)
- March 28, 2018 Montachusett MPO Meeting
- April 5, 2018 MRPC Meeting
- April 11, 2018 MJTC Meeting
- April 18, 2018 Montachusett MPO Meeting
- May 3, 2018 MRPC Meeting
- May 9, 2018 MJTC Meeting
- May 16, 2018 Montachusett MPO Meeting
- June 7, 2018 MRPC Meeting
- June 13, 2018 MJTC Meeting
- June 20, 2018 Montachusett MPO Meeting
- July 5, 2018 MRPC Meeting
- July 11, 2018 MJTC Meeting
- July 18, 2018 Montachusett MPO Meeting

Through this extensive mailing and notification process, it is anticipated that local and state agencies and officials, as well as other groups/organizations, will be notified of the TIP development process and further coordination and/or consultation will occur as decisions and documents are prepared. As stated in 23 CFR 450.316 (3) (b) the MPO continues to seek to consult with "agencies and officials responsible for other planning activities within the Metropolitan Planning Area (MPA) that are affected by transportation or coordinate its planning process (to the maximum extent practicable) with such planning activities".

In addition, notices and information encouraging input to the TIP development process have been placed on the MRPC website. This includes all appropriate meeting dates, memos announcing the start of the comment period and the availability of draft documents as well as the draft document itself. These posting were also made to the website in a Spanish language version. Upon endorsement of the TIP by the MPO, final versions of the TIP as well as a project summary are then made available via the MRPC website. All comments received during the public comment and review period, as well as appropriate responses to them, are detailed in the Appendix Comments and Responses at the end of this document.

Project Selection/Prioritization – Transportation Evaluation Criteria

For the purposes of project selection and programming, any project listed in Year 1 of the endorsed TIP will be considered to have the concurrence of the MPO without further action required. Prioritization of projects will have taken place by virtue of placement of a project in Years 1 to 5 of the TIP. Out years may contain unallocated funding amounts based upon anticipated federal aid regional target funds. These yearly listing will be further defined as specific projects in subsequent year TIPs.

Prioritization of projects is based upon input from MassDOT regarding project design and implementation status, local prioritization from chief elected officials, scoring of the project based upon the Transportation Evaluation Criteria (TEC), fiscal constraints for the Montachusett Region, consensus vote by the MJTC and formal adoption by the MPO. Throughout this procedure, input from local citizens are reviewed and considered where appropriate in the prioritization process.

As indicated, an initial project listing is obtained from MassDOT and the local communities. These projects are then reviewed one by one to ascertain their current status as to design and potential advertising dates. Projects are then scored and evaluated utilizing the Transportation Evaluation Criteria (TEC). The TEC is a series of criteria to "be applied by the appropriate implementing agency during the project development stage to ensure that our limited budgetary and staff resources are committed to the best proposals; to assist the MPO process of programming federal funding through the regional Transportation Improvement Programs; and to examine existing projects in the pipeline to determine which should ultimately proceed to design and construction."

The criteria are used to cover all types of transportation projects from simple resurfacing to reconstruction and expansion. Benefits and impacts are examined for transportation as well as economic development, community effects, environmental justice issues, land use and environmental impacts. Final scores based upon the TEC then become part of the decision and prioritization process.

The Montachusett TEC is based on a scoring scale of 0 to 100 with the higher the score the greater the project priority. To establish the 100-point scale, 25 separate questions were derived and grouped into six (6) categories. The categories and individual questions/criteria per category breakdown as follows:

| | No. of Individual | Total Maximum |
|-----------------------------------|--------------------|----------------|
| Category | Questions/Criteria | Category Score |
| Condition | 4 | 12 |
| Mobility | 4 | 16 |
| Safety | 4 | 20 |
| Community Effects and Support | 5 | 20 |
| Land Use and Economic Development | 4 | 16 |
| Environmental Effects | 4 | 16 |
| Totals | 25 | 100 |

Montachusett TEC Category and Scoring Summary

The Maximum Category scores reflect the relative importance of that category as determined by the MPO during the establishment of the Montachusett TEC, i.e. Safety and Community Effects and Support were deemed to be of greater significance in the prioritization process. For a sample TEC scoring sheet, please refer to the appendix of this document.

At the start of each TIP development cycle, MPO staff reviews the latest information and status of the regions projects in order to update their individual TEC scores. As projects move forward, more details related to their scope, purpose and impacts can usually be derived. This in turn results in a better ability to score the project based on the TEC questions.

After all projects are scored, a prioritized listing is established by the MPO. This listing helps to drive the development of each of the individual federal fiscal years of the TIP. Two additional elements of the project also play into the prioritization process; the projects estimated total cost and its current design status. The current design status of a project significantly affects its potential for advertisement in a particular fiscal year. Delays in permitting, right-of-way, environmental impacts, etc. can prevent a highly-scored project from being included in particular year. Thus, close coordination with MassDOT on project development is an important aspect of developing a workable TIP. In addition, the TIP is required to be fiscally constrained, i.e. a region cannot program more projects than the anticipated federal funds available for its region. MassDOT provides each region with these federal "target" figures to assist in the development of a fiscally constrained document. These fiscal limits can impact how many projects can be allocated in a certain year, thus consensus on cost estimates are also key in the TIP process. From this, a project listing by fiscal year is developed. The listing is then reviewed by state and local

officials, as well as the MJTC and the MPO, to determine fiscal constraint by funding year. Any problems are then identified. Through the MPO, projects are adjusted and prioritized in order to resolve the identified problems.

The following table provides the Montachusett FFY 2019 – 2023 TIP Project Priority Listing based upon their respective TEC scoring.

| | | | | мо | ΝΤΑΟ | CHUS | ETT N | /ΡΟΙ | FY 2 | 019-2 | 2023 | TIP P | ROJE | CTS - | TEC S | SCOR | ING | PRIO | RITIZE | D LIS | TING | | | | | | | | | 3/14/2018 |

AMENDMENT/ADJUSTMENT PROCEDURES

In order to minimize constraints on programming projects, the endorsed TIP will have the provision, as adopted by the MPO, that will allow relatively minor modifications be made to the TIP without formal MPO action. Significant changes will continue to require MPO action through the amendment process.

Minor modifications may include such actions as:

- moving a project in either direction between the sequential years, ex. Years 1 and 2, Years 2 and 3, etc.;
- changes in funding amounts (typically less than 10% of the total cost) or categories within the same fiscal year.

Minor modifications will be accomplished through an agreed-upon administrative action with the approval of the MPO. That action will include approval of the modification by the MPO at a duly constituted meeting and written notification of the MPO members. Under an adjustment, a formal signatory endorsement and a 21-day public review period will not be required.

Significant changes to the TIP include major actions such as:

- the addition or deletion of a Federal Aid project;
- if the design, scope or budget of a project is found to have changed significantly as determined by the MJTC and MPO (typically cost changes of more than 10%);
- moving a project from Non-Federal Aid to one of the Federal Aid funding categories;
- moving a project in either direction between non-sequential fiscal years, ex. from Year 1 of the TIP to Year 3;
- advancing a project from the Appendix project list to either Years 1, 2, 3 or 4.
- advancing a project from the out Year 5 to either Years 1, 2 or 3.

Significant changes to the TIP will require formal endorsement of an amendment. This amendment process will include a 21day public comment period, or an abbreviated comment period of not less than ten (10) days under what the MPO considers to be extraordinary circumstances, as outlined in the federal planning regulations and the Montachusett Public Participation Program (as endorsed May 25, 2016 and amended on March 15, 2017), approval of the amendment and signatory endorsement by MPO members at a subsequent MPO meeting.

The MPO will review each request change and determine whether the adjustment or amendment procedure is required for the proposed action.

COORDINATION WITH REGIONAL TRANSPORTATION PLANNING

The 2016 Montachusett Regional Transportation Plan (RTP) was completed and endorsed by the MPO on July 30, 2015. It provides the basic framework for implementing future short-range and long-range transportation and air quality improvements in the Montachusett Region. In addition, it sets the basic transportation goals and objectives for the region. These goals and objectives are consistent with the long-range land use plan and the social, economic, and environmental policies of the region.

The 2016 Regional Transportation Plan (RTP) serves as a long-term blueprint of the region's transportation system. The current network is compared to the past and envisioned 25 years into the future. Needs are identified and a framework of

projects and priorities are set across all modes, i.e. highway, transit, bicycle and pedestrian, freight, etc. The RTP also serves to provide as a basis for any federally financed transportation and transit project, program or study.

The Transportation Plan decisions reflect the federally certified 3C (comprehensive, cooperative and continuing) process, and are based upon Federal, State and local policies, detailed technical analysis, and citizen participation.

Projects in the Fiscal Year 2019-2023 TIP are consistent with the previous as well as the current Regional Transportation Plan for the Montachusett Region as completed in 2003, 2007, 2012 and 2016. The transit portion of the region's transportation system and its needs is broken down into several components. These include operations of the Regional Transit Authority and its capital funding needs, as well as commuter rail services (from the MBTA) with park-and-ride managed by the RTA.

Recommendations in the Regional Transportation Plan concerning the Transit Authority component of the region's transportation system are drawn directly from transit development studies and other work tasks. Recommendations made to improve the MART transit system include:

- Continued monitoring of routes and schedules so that any beneficial changes can be identified and implemented;
- Alternative sources of funding for continued transit operations must be developed and instituted;
- The marketing effort must be upgraded and increased to inform the public of transit availability and efficiency;
- Additional support equipment, ramp equipped buses, lift equipped vans, etc., should be acquired;
- Driver safety, CPR, first aid, and sensitivity courses should be maintained;
- Transit services for the elderly and individuals with disabilities should continue to be upgraded as necessary to insure both availability and accessibility in compliance with MART's ADA complementary paratransit plan;
- Paratransit services provided by MART to social service agency clients should continue to be monitored for coordination of effort;

Recommendations for funding of the Mobility Assistance Program including the Section 5310 program are also noted in the Regional Transportation Plan. It states that in order to provide increased mobility for Montachusett residents that do not own automobiles or that choose to be less dependent on the automobile; MART will need to continue to develop and implement appropriate and innovative public transit programs. It also states that elderly and disabled services provided by MART and social service agencies should continue to be monitored for coordination of effort. The vehicles that MART is requesting under MAP would be used as replacements to the vehicles operated in the Dial-A-MART, COA, and ADA complementary Paratransit programs. The Dial-A-MART program coordinates transportation services for social service agencies, disability community advocacy organizations, etc. located in the Montachusett Region.

Capital funding needs can be broken down into three categories: vehicles for revenue service, capital equipment purchases, and construction/rehabilitation projects. The Regional Transportation Plan states that in addition to increased and improved routing and scheduling, it will be necessary for MART to maintain and improve the operating condition of its vehicle fleet. Federal Regulations under MAP-21 and the FAST Act also require that federal recipients maintain their federally funded assets in a State of Good Repair under a Transit Asset Management Plan. Vehicle fleets, equipment and facilities will be programed under the TIP in accordance with meeting the goals established in that plan.

EQUITY DISTRIBUTION ANALYSIS OF TIP PROJECTS

MassDOT and FHWA require MPO's to include a geographic and social equity analysis of past and current TIP projects. This analysis is broken into two parts. The first is an examination of federal target eligible projects contained within this TIP, i.e. FFY 2019-2023. The second involves a five year "look back" at prior TIP projects. For this analysis that would include projects from FFY 2014 to 2018.

Methodology

Projects identified for the two analyses include site specific projects, i.e. bridge replacements/rehabilitations and intersection improvements, as well as road and highway segments that may stretch several miles and across multiple communities. The identified projects were then mapped for each analysis against identified Environmental Justice and/or Title VI populations. Staff then assessed the project locations relative to the identified populations.

For each of these analysis, the 2015 American Community Survey 5-year estimates were utilized. All applicable maps can be found in the appendix of this document. The table below illustrates which ACS table was used to obtain the data for each variable used in determining Environmental Justice and Title VI designated areas.

| 2013 AC3 300100 | 2444 | | | | |
|-----------------------------------|----------------|--|--|--|--|
| Variable | 2015 ACS Table | | | | |
| Median Household Income | B19013 | | | | |
| Minority | B03002 | | | | |
| Limited English Proficiency (LEP) | B16002 | | | | |
| Elderly | B01001 | | | | |
| Individuals with Disabilities | DP02 | | | | |
| Foreign Born | B05002 | | | | |

2015 ACS Source Data

Environmental Justice and Title VI populations are defined in the tables below.

Environmental Justice and Title VI Definitions for Analysis

Environmental Justice Block Groups 1. Block group whose annual median household income is equal to or less than 65 percent (%) of the statewide median

- (\$62,133 in 2010); or 2. Twenty five access (25%) or more of the accidents identifying or minority or
- 2. Twenty-five percent (25%) or more of the residents identifying as minority; or
- 3. Twenty-five percent (25%) or more of the households having no one over the age of 14 who speaks English only or very well Limited English Proficiency (LEP).

FHWA Title VI Communities

- 1. <u>Elderly</u> (% of Total Population > 65 that is higher than the regional average of 13.98%)
- 2. Individuals with Disabilities (% of population with a disability that is higher than the regional average of 12.35%)
- 3. <u>Minority</u> (% of population including Hispanic or Latino of any race that is considered non-white and is higher than the regional average of 17.46%)
- 4. Foreign Born (% of population that is Foreign Born and is higher than the regional average of 7.85%)
- 5. Language (% of Population Spoken Language Other than English that is higher than the regional average of 13.56%)

FTA Title VI Communities

- 1. <u>Minority</u> (% of population including Hispanic or Latino of any race that is considered non-white and is higher than the regional average of 17.46%)
- 2. Low Income (% Estimated Below Poverty Level that is higher than the regional average of 11.93%)

FFY 2019-2023 Target Eligible Projects

To assess the possible benefits or burdens of the projects within the FFY 2019-2023 TIP, those projects identified as federal aid target eligible were identified. The analysis for this TIP is limited to these projects as they are the projects with the most programming control of the MPO. Bridge projects as well as those on the Interstate system, etc., are prioritized at the state level.

The following table identifies 25 target eligible projects in the Montachusett Region, listed by their calculated TEC score as well as their anticipated FFY year listing for this TIP. Some of the projects are identified as being listed in the Appendix of the TIP. The Appendix is a listing of projects without an identified funding source or program year due to design status and/or fiscal constraint issues.

FFY 2019-2023 Target Eligible Projects

| FFY 2019-2023 | MassDOT ID # | Community | Description | TEC | Est Cost | Within EJ | Within Title VI F | opulation |

FFY 2019-2023 Target Eligible Projects Equity Analysis

An analysis of the geographic distribution of the twenty-five projects within the 2019-2023 TIP resulted in an understanding of the percentage of TIP projects and TIP funds allocated within Environmental Justice and Title VI areas. The results of this analysis are as follows:

• Thirteen (13) of the 25 projects (52%) are within or directly adjacent to identified EJ block groups representing a total cost of \$44,411,999, or 53% of the total project costs of \$83,514,499. As seen in the table below, the percentage of TIP funds allocated within EJ areas is significantly above the percentage of the region's population that lives within EJ block groups, indicating an equitable distribution of TIP projects and funds within the region.

| | Population Represented in Communities (2015) | Percent Population Represented | TIP Project Investment | Percent Projects in EJ/Non EJ Communities by Total Investment (\$) | | |
|------------------------|---|--------------------------------------|---------------------------|--|--|--|
| Within EJ Communities | 74,488 | 31% | \$ 44,411,999 | 53% | | |
| Outside EJ Communities | 166,106 | 69% | \$ 39,102,500 | 47% | | |
| Total | 240,594 | 100% | \$ 83,514,499 | 100% | | |

Equity Analysis Summary – EJ versus FFY 2019-2023 Target Eligible Projects

• Fourteen (14) of the 25 projects (56%) were located in FHWA Title VI areas with a total cost of \$45,338,123, or 54% of the total project costs of \$83,514,499. From the table below, one may conclude that the percentage of total TIP funds invested in FHWA Title VI communities is not proportionate to the percentage of the region's population living in FHWA Title VI communities. However, because FHWA Title VI designated is aggregated at the community level, it is very likely that a significant portion of the populations living in FHWA Title VI designated communities do not possess the characteristics of FHWA Title VI designations. Therefore, there is a significant possibility that the actual percentage of the region that possesses FHWA Title VI characteristics is lower than the figures presented below.

| | Population Represented in Communities (2015) | Percent Population Represented | TIP Project Investment | Percent Projects in EJ/Non EJ Communities by Total Investment (\$) |
|--------------------------------------|---|--------------------------------------|---------------------------|--|
| Within FHWA Title VI Communities | 188,426 | 78% | \$ 45,338,121 | 54% |
| Outside FHWA Title VI Communities | 52,168 | 22% | \$ 38,176,376 | 46% |
| Total | 240,594 | 100% | \$ 83,514,499 | 100% |

Thirteen (13) of the 25 projects (52%) were located in FTA Title VI areas with a total cost of \$44,341,283, or 53% of the total project costs of \$83,514,499. As with the FHWA Title VI Community Analysis, the regional FTA Title VI population numbers may be skewed to be greater than they are due to the level of analysis being at the community level.

| | Population Represented in Communities (2015) | Percent Population Represented | TIP Project Investment | Percent Projects in EJ/Non EJ Communities by Total Investment (\$) |
|-------------------------------------|---|--------------------------------------|---------------------------|--|
| Within FTA Title VI Communities | 160,335 | 67% | \$ 44,341,283 | 53% |
| Outside FTA Title VI Communities | 80,259 | 33% | \$ 39,173,216 | 47% |
| Total | 240,594 | 100% | \$ 83,514,499 | 100% |

Equity Analysis Summary – FTA Title VI versus FFY 2019-2023 Target Eligible Projects

2014-2018 Projects Five Year Lookback

The following table identifies 24 projects for the Montachusett Region implemented in the last five years, i.e. from 2014 to 2018. All projects appeared in a prior TIP and were advertised for construction, initiated construction or completed construction prior to the development of this TIP.

2014-2018 Projects – Five Year Lookback

| MassDOT Community | | Description | Est Cost Project TIP Year | Within EJ | Within Title VI Population | | |
|----------------------|------------------------------------|---|---|-----------|----------------------------|----------------|--------------------------|
| ID # | Community | Description | Info | The rear | Population | FHWA | FTA |
| 603514 | Leominster | Bridge Replacement, L-08-014, Whitney Street Over the Monoosnoc Brook | \$2,873,163 | 2014 | x | x | x |
| 604439 | Winchendon | Multi-Use Trail Construction (North Central Pathway - Phase V) Includes W- 39-023, W-39-024 & W-39-028 | Central Pathway - Phase V) Includes W- \$1,987,709 2015 | | x | | |
| 604515 | Royalston | Bridge Replacement, R-12-006, North Fitzwilliam Road Over Lawrence Brook | \$1,313,437 | 2016 | | x | |
| 604838 | Winchendon | Bridge Replacement, W-39-001, Harris Road Over Tarbell Brook | \$2,129,943 | 2016 | | | |
| 604928 | Leominster | Reconstruction of Mechanic Street, From Laurel Street to The Leominster Connector | \$2,929,315 | 2016 | x | x | x |
| 604960 | Clinton | Reconstruction & Related Work on Water Street and Bolton Road (1.2 Miles) | \$4,433,939 | 2015 | x | x | x |

| 607475 | Winchendon | Resurfacing & Related Work on Route 12, From Mill Street/Beginning of State Highway to New Hampshire State Line | \$1,571,623 | 2017 | | | |
| 608188 | Gardner/Leominster/ Sterling | Intersection Improvements at 3 Locations | \$2,622,497 | 2018 | x | x | х |
| 606124 | Fitchburg/Lunenburg/ Leominster | Reconstruction of Summer Street and North Street | \$9,939,131 | 2018 | x | x | х |
| 608179 | Royalston | Bridge Replacement, R-12-009, North Fitzwilliam Road Over Lawrence Brook | \$1,721,880 | 2018 | | x | |
| 605094 | Fitchburg | Bridge Replacement, F-04-003, State Route 31 over Lawrence Brook | \$3,120,258 | 2018 | | x | x |
| 608864 | Gardner | Bridge Replacement, G-01-008, Pleasant Street over the B&M Railroad | \$4,404,240 | 2018 | x | x | x |
| | | Total | \$72,741,218 | | Within EJ Population | Within Both FH | WA & FTA Titl ulation |
| | | | | | - | \$41,50 | |
| | | | | | \$31,866,317 | FHWA | FTA |
| | | | | | | \$60,122,133 | \$41,508,195 |

2014-2018 Projects Five Year Lookback Equity Analysis

An examination of projects funded over the last five TIPs, identified 24 individual projects with an estimated total cost of \$72,741,218. A geographic distribution of these 24 projects against those areas categorized as Environmental Justice (EJ) or Title VI areas resulted in the following:

• Nine (9) of the 24 projects (38%) are within or directly adjacent to identified EJ block groups representing a total cost of \$31,866,317, or 44% of the total project costs of \$72,741,218. As seen in the table below, the percentage of TIP funds allocated within EJ areas is significantly above the percentage of the region's population that lives within EJ block groups.

| | Population Represented in Communities (2015) | Percent Population Represented | TIP Project Investment | Percent Projects in EJ/Non EJ Communities by Total Investment (\$) |
|------------------------|---|--------------------------------------|---------------------------|--|
| Within EJ Communities | 74,488 | 31% | \$ 31,866,317 | 44% |
| Outside EJ Communities | 166,106 | 69% | \$ 40,874,901 | 56% |
| Total | 240,594 | 100% | \$ 72,741,218 | 100% |

Equity Analysis Summary – EJ versus FFY 2014-2018 Projects

Seventeen (17) of the 24 projects (71%) were located in FHWA Title VI areas with a total cost of \$60,122,133, or 83% of the total project costs of \$72,741,218. As mentioned previously, the community-level of analysis in determining Title VI communities means that there is a likelihood that a number of people within the population do not possess the characteristics that apply to Title VI communities, and therefore the allocation of 83% of TIP funds within these communities may be well above an equitable percentage.

| | Population Represented in Communities (2015) | Percent Population Represented | TIP Project Investment | Percent Projects in EJ/Non EJ Communities by Total Investment (\$) |
|--------------------------------------|---|--------------------------------------|---------------------------|--|
| Within FHWA Title VI Communities | 188,426 | 78% | \$ 60,122,133 | 83% |
| Outside FHWA Title VI Communities | 52,168 | 22% | \$ 12,619,085 | 17% |
| Total | 240,594 | 100% | \$ 72,741,218 | 100% |

Equity Analysis Summary – FHWA Title VI versus FFY 2014-2018 Projects

• Twelve (12) of the 24 projects (50%) were located in FTA Title VI areas with a total cost of \$41,508,195, or 57% of the total project costs of \$72,741,218. As with the FHWA Title VI Community Analysis, the regional FTA Title VI population numbers may be skewed to be greater than they are due to the level of analysis being at the community level, and therefore the allocation of 57% of TIP funds within these communities is likely equitable.

| | Population Represented in Communities (2015) | Percent Population Represented | TIP Project Investment | Percent Projects in EJ/Non EJ Communities by Total Investment (\$) |
|-------------------------------------|---|--------------------------------------|---------------------------|--|
| Within FTA Title VI Communities | 160,335 | 67% | \$ 41,508,195 | 57% |
| Outside FTA Title VI Communities | 80,259 | 33% | \$ 31,233,023 | 43% |
| Total | 240,594 | 100% | \$ 72,741,218 | 100% |

Equity Analysis Summary – FTA Title VI versus FFY 2014-2018 Projects

Summary of Equity Analysis

The percentage of TIP funds that have been allocated in Environmental Justice areas is greater than the percentage of the region's population that reside in Environmental Justice areas. Additionally, 17 out of 24, or 71% of TIP projects in the past five years have been located in either FHWA or FTA Title VI Communities. Overall, it can be determined that the projects implemented through the TIP process in the past five years have benefitted the Environmental Justice and Title VI populations in an equitable manner. Such analysis will be conducted on a yearly basis to ensure that the Environmental Justice and Title VI populations continue to benefit from the transportation planning process in the Montachusett Region.

SPECIAL EFFORTS FOR ELDERLY AND DISABLED

The U.S. Department of Transportation's regulations regarding Nondiscrimination on the Basis of Handicap requires that transit operators certify that "special efforts are being made in its service to provide transportation that handicapped persons, including wheelchair users and semi-ambulatory persons can use." The Montachusett Regional Transit Authority (MART) has been so certified by FTA. The Montachusett Regional Planning Commission annually monitors and updates MART's compliance with the Americans with Disabilities Act Regulations. In compliance with a DOT rule to implement the transportation provisions of the ADA, MART has submitted an ADA compliance Para-transit plan and at this time has met all six criteria established by the Regulations; therefore, the ADA plan is complete. The following policies regarding special efforts are currently in effect.

- half fare on fixed route transit for eligible elderly and disabled individuals;
- fixed route service designed to serve elderly housing, shopping centers, medical facilities, and elderly social centers;
- curb-to-curb service with lift equipped vans provided by local Councils on Aging/private operators;
- half fare on commuter rail service for elderly and disabled individuals;
- continuation of next day ADA eligible van service which operates the same hours as fixed route service;
- operation of Dial-A-MART program which is a coordination of transportation needs of clients of social service agencies;
- no restriction on trip purpose for ADA Para-transit services;
- a twenty percent discount on monthly bus passes for eligible elderly and disabled individuals;

FY19 Projects

Projects in the FY19 TIP in the Section 5307 category contain program elements for the elderly and disabled. The estimated costs in the Year 1 Element in the Section 5307 category include the costs of operating the special services described above.

Section 5310 projects are awarded by the state through a grant process. Projects awarded within the Montachusett region will be amended into the TIP after award.

FEDERAL LEGISLATION

In December 2015, the Federal Surface Transportation Authorization known as Fixing America's Surface Transportation (FAST) Act passed into law. The FAST Act "largely maintains current structures and funding shares between highways and transit" and "makes changes and reforms to many Federal transportation programs, including streamlining the approval processes for new transportation projects, providing new safety tools, and establishing new programs to advance critical freight projects" (source: U. S. DOT website). The FAST Act retains most of the planning requirements of prior federal regulations, i.e. Moving Ahead for Progress in the 21st Century (MAP-21) and the Safe Accountable Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU).

The FAST Act added two additional factors to the eight planning factors for both metro and statewide planning identified in MAP-21:

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity and efficiency;
- Increase the safety of the transportation system for all motorized and non-motorized users;
- Increase the ability of the transportation system to support homeland security and to safeguard the personal security of motorized and non-motorized users;
- Increase accessibility and mobility of people and freight;
- Protect and enhance the environment, promote energy conservation, improve the quality of life and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- Promote efficient system management and operation;
- Emphasize the preservation of the existing transportation system;
- Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and
- Enhance travel and tourism.

A key feature of the FAST Act legislation that is maintained from prior legislation "is the establishment of a performance- and outcome-based program. The objective...is for States to invest resources in projects that collectively will make progress toward the achievement of the national goals." National performance goals have been established in seven areas:

- Safety To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
- Infrastructure condition To maintain the highway infrastructure asset system in a state of good repair.
- Congestion reduction To achieve a significant reduction in congestion on the National Highway System.
- System reliability To improve the efficiency of the surface transportation system.
- Freight movement and economic vitality To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.

- Environmental sustainability To enhance the performance of the transportation system while protecting and enhancing the natural environment.
- Reduced project delivery delays To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

Performance measures and targets are required to be established by FHWA, state DOTs, MPOs and other stakeholders in consultation with each other over the upcoming years. The Montachusett MPO is committed to working with MassDOT, FHWA and other partners to develop and track the performance of elements of the regional transportation system and to utilize these performance measures as a tool or guide in the transportation planning process.

Regional Transportation Plan – Performance Measures

MRPC staff has continued to review available data, information, state and federal goals and requirements in order to develop and expand regional local performance measures. A series of performance measures were identified during the development of the 2016 Regional Transportation Plan (RTP). These performance measures form the basis for system monitoring in the Montachusett Region only. Additionally, the regional performance measures are incorporated into the decision-making process for the TIP and where applicable are linked to transportation investment decisions, i.e. the Transportation Evaluation Criteria (TEC). As these measures are further defined and reviewed by the MPO, it is expected that the TEC will also be revised and/or updated to reflect them.

As the MassDOT moves forward and defines statewide performance measures in response to federal guidelines, the MPO will review and vote on whether to adopt the state developed performance measure or continue to maintain a comparable regional performance measure.

The following tables outline the RTP defined Goals, Objectives and Performance Measures that address the seven National performance goals.

| Goal 1 – Improve and Maintain Safety and Security | |
|--|--|
| Objectives | Performance Measures |
| • Seek to reduce the number and severity of vehicular crashes within the region across all modes. | 1. Reduce the Regional EPDO and percentage of fatal and injury crashes among vehicles, bicycles and pedestrians by 10% over a 10-year period. |
| • Promote projects that are designed to address high crash locations and prioritize their implementation. | Reduce the fatality rate by 10% and the serious injury rate by 10% from current levels in 10 years. |
| • Promote and encourage education outreach programs to drivers, pedestrians and bicyclists regarding rules and responsibilities. | Identify and/or implement 4 to 5 corrective projects at identified top 10 high incident locations over a 10-year period. |
| • Expand community involvement with federal and state programs and education initiatives such as Safe Routes to School. | Conduct 1 to 2 Road Safety Audits at identified high crash locations every 2 years. |
| • Seek to improve user awareness along all transportation networks through better identification, pavement markings and signage with an emphasis on bicycle and pedestrian routes. | 5. Increase the number of communities involved in the Safe Routes to School program. |

Regional Transportation Plan Goals, Objectives and Performance Measures Summary

| Goal 1 – Improve and Maintain Safety and Security (cont.) | | |
|--|---|--|
| Objectives | Performance Measures | |
| • Seek to expand the number and use of variable message signs along major roads such as Route 2 and I-190 to inform drivers of potential unsafe conditions and important alerts. | Maintain involvement with the Central MA Regional Homeland Security Council and evacuation planning efforts. | |
| • Promote projects that address key identified emergency and evacuation routes in order to maintain effectiveness. | Maintain the average number of preventable fixed route crashes under 2+ per month and demand responsive crashes under 5+ per month. | |

| Goal 2 – Reduce Congestion and Improve Mobility | | | |
|--|--|--|--|
| Objectives | Performance Measures | | |
| Monitor locations and promote projects that address congested roadways within the region. | Conduct Travel Time data collection along 3 to 5 major roadways throughout region on an annual basis. | | |
| • Support programs that quickly and efficiently address bridge deficiencies across all modes with an emphasis on freight and rail locations. | Identify 1 bottleneck location and conduct a study every 2 years in order to develop and/or implement corrective measures. | | |
| Encourage communities to address local mobility issues in order to promote mode shift options in congested areas. | Increase the number of Complete Street certified communities within the region. Seek to have a majority of communities formally certified within 10 years. | | |
| Seek to increase travel options within the region through the promotion of trails, Complete Streets, transit, land use and their interactions. | | | |

| Goal 3 – Promote and Seek Equitable Transportation for All | | | |
|---|--|--|--|
| Objectives | Performance Measures | | |
| Seek to increase access to transit options through improved dissemination of available service information. | Increase formal membership and public outreach within Montachusett Joint Transportation Committee (MJTC) of Title VI and Environmental Justice groups. | | |
| Improve outreach and partnerships between RTA's and social service agencies, schools, health centers, neighborhood organizations, etc. | Conduct benefits/burdens review of federal aid projects identified through the TIP process on an annual basis. | | |
| Seek to expand and increase transit service operations to improve job access and commercial services for all users. | 3. Continue to work with the Montachusett Regional Transit Authority (MART) to expand outreach to and usage by Title VI and Environmental Justice communities through promotions and training methods on how to utilize the system. | | |
| Promote the development of improvements and options across all modes for areas that serve Title VI and Environmental Justice populations. | | | |
| Monitor fee options in order to maintain equitability for all users. | | | |
| Actively seek and identify organizations and agencies of Title VI and Environmental Justice populations and conduct direct outreach to encourage involvement and participation in the planning process. | | | |

| Goal 4 – Improve System Preservation and Maintenance of All Modes | | |
|--|---|--|
| Objectives | Performance Measures | |
| Seek to encourage and prioritize preservation projects within communities in order to maintain a state of good repair for all modes. | Continue pavement management data collection and analysis efforts on an annual basis through a rotating 3-year schedule of federal aid eligible roadways. | |

| Goal 4 – Improve System Preservation and Maintenance of All Modes (cont.) | | | |
|--|--|--|--|
| Objectives | Performance Measures | | |
| • Continue to monitor, and revise as needed, the Transportation Evaluation Criteria (TEC) to encourage those projects that help to maintain a state of good repair. | 2. Increase the percentage of categorized "Good" to "Excellent" federal aid eligible roadway miles within the region over a 10-year period. | | |
| • Continue the promotion and prioritization of bridge projects throughout the region. | Decrease the number of identified "Structurally Deficient" bridges within the Region. | | |
| • Encourage communities to maintain and monitor trials that provide transportation options throughout the year. | 4. Review and revise the Transportation Evaluation Criteria (TEC) every 2 to 5 years to maintain a viable prioritization process. | | |
| Seek to encourage additional funds for maintenance as well as the development of a potential federal/state funded preservation program. | 5. Maintain the number of road service calls due to mechanical failures on the fixed route and demand responsive systems under 10 per month. | | |
| Encourage and support continued operation, maintenance, state of good repair and expansion of the transit system. | Maintain a percentage of operated scheduled trips per month at 90% or better. | | |
| Encourage communities with viable preservation projects to seek funding and implementation through and in collaboration with the Transportation Improvement Program (TIP) process. | 7. Achieve an average on time ranking on the fixed route system of 95% by 2040. | | |
| • Encourage state and local officials to evaluate the benefits of a joint procurement process for equipment, materials and services to help reduce costs. | | | |

| Goal 5 – Improve Economic Vitality and Freight Movement | | | |
|---|---|--|--|
| Objectives | Performance Measures | | |
| Seek to promote economic advantages of the regional trail network and recreational destinations. | Revise, update and distribute a Regional Trail map, in coordination with the Montachusett Regional Trail Coalition (MRTC), by 2020. | | |
| Seek to establish and prioritize major trail connections throughout the region. | 2. Review and analyze 1 to 2 freight corridors through development of a Unified Planning Work Program (UPWP) task every 5 years. | | |
| • Seek to promote and expand commuter transit and rail options beyond the urban centers. | | | |
| Prioritize and improve railroad and other restricted bridges in order to enhance freight mobility. | | | |
| Seek to improve freight and general vehicle access and connection to Route 2 throughout the region. | | | |

| Goal 6 – Improve Transportation Options and Promote Heathy Modes | |
|---|--|
| Objectives | Performance Measures |
| Seek to expand travel options and modes across the region through improved connections and services. | 1. Increase the number of bicycle facilities, ex. Bicycle racks and lockers and on-board bus racks, at transit centers within 12 years. |
| Promote additional bicycle facilities for transit centers and vehicles. | 2. Conduct 3 to 4 walk audits over a 12-year period in interested communities. |
| Promote an improved local review process that addresses issues related to Complete Streets, trail development, sidewalk implementation and mobility improvement as well as mode shift options within their community. | Establish a top 5 list of prioritized trail connections, within and across communities, in 4 years with updates every 4 years. |

| Goal 6 – Improve Transportation Options and Promote Heathy Modes (cont.) | |
|---|----------------------|
| Objectives | Performance Measures |
| Seek to increase and encourage a shift from single occupant vehicles to transit, bicycle and pedestrian modes through improved transit, van/car pool and trail options. Improve infrastructure, i.e. sidewalks, benches, shelters, shared lanes, etc., along competing modes to encourage increased usage. | |

| Goal 7 – Reduce Green House Gas and Promote Environmental Practices and Sustainability | |
|---|---|
| Objectives | Performance Measures |
| Seek to reduce Greenhouse Gas emissions through support and implementation of Congestion Mitigation Air Quality (CMAQ) and Transportation Alternative Program (TAP) projects as well as state mode shift goals. | Increase percentage of alternative fuel vehicles within the overall transit fleet by 2020. |
| Prioritize vehicle replacement in the transit fleet with applicable and cost effective alternative fuel vehicles. | Program and implement 100% of Congestion Mitigation Air Quality (CMAQ) projects within the regional Transportation Improvement Program (TIP). |
| Encourage communities to promote and support Green Streets through Low Impact (LID) and Transit Oriented (TOD) Development projects as well as stormwater drainage improvement. | |
| Encourage and promote transit options to new residential and smart growth developments. | |
| • Encourage and support the use of alternative fuel vehicles by the public with infrastructure support services and by transit systems through vehicle replacement programs. | |

As previously stated, these performance measures are to be utilized on a regional level to assist in monitoring RTP goals. They are not intended to replace any state performance measure adopted by the MPO. For a status review of the Regional Performance Measures, please refer to the MRPC report "*Montachusett Performance Measures: Monitoring Regional Objectives – September 2017.*"

Transportation Performance Management

FHWA defines Transportation Performance Management as a strategic approach that uses system information to make investment and policy decisions to achieve national performance goals. In short, Transportation Performance Management:

- Is systematically applied, a regular ongoing process
- Provides key information to help decision makers allowing them to understand the consequences of investment decisions across transportation assets or modes
- Improving communications between decision makers, stakeholders and the traveling public.
- Ensuring targets and measures are developed in cooperative partnerships and based on data and objective information

Effective on April 14, 2016 FHWA established a final rule on the first of its Performance Measures, Safety Measures (PM 1). Targets related to PM 1 were then set by MassDOT.

Statewide Performance Measures - Safety

The Montachusett MPO has chosen via a formal vote at the January 24, 2018 MPO meeting to adopt the statewide safety performance measure targets set by MassDOT for Calendar Year (CY) 2018. In setting these targets, MassDOT has followed FHWA guidelines by using statewide crash data and Highway Performance Monitoring System (HPMS) data for vehicle miles traveled (VMT) in order to calculate 5 year, rolling average trendlines for all FHWA defined safety measures. CY 2018 targets for four of the five safety measures—total number of fatalities, rate of fatalities per 100 million vehicle miles traveled, total number of serious injuries, and rate of serious injuries per 100 million VMT-were established by extending their respective trendlines into the 2014-2018 time period. All four of these measures reflect a decrease in statewide trends. The fifth safety measure, total number of combined serious injuries and fatalities for non-motorized modes, is the only safety measure for which the statewide trendline depicts an increase. MassDOT's effort to increase the non-motorized mode share throughout the Commonwealth has posed a challenge to simultaneously reducing non-motorized injuries and fatalities. Rather than adopt a target that depicts an increase in the trendline, MassDOT has elected to establish a target of non-motorized fatalities and injuries in CY 2018 to remain constant from the rolling average for 2011-2015. In recent years, MassDOT and the Montachusett MPO have invested in "complete streets," bicycle and pedestrian, intersection and safety improvements in both the Capital Investment Plan (CIP) and Statewide Transportation Improvement Program (STIP) that address increasing mode share and incorporate safety mitigation elements into projects. Moving forward, the Montachusett MPO, alongside MassDOT, is actively seeking to improve data collection and methodology for bicycle and pedestrian VMT counts, and to continue analyzing crash clusters and crash counts that include both motorized and non-motorized modes in order to address safety issues at these locations.

In all safety categories, MassDOT has established a long-term target of "Toward Zero Deaths" through MassDOT's Performance Measures Tracker and will be establishing safety targets for the MPO to consider for adoption each calendar year. While the MPO is not required by FHWA to report on annual safety performance targets, FHWA guidelines require MPOs to adopt MassDOT's annual targets or perennially establish their own. As stated above, the Montachusett MPO formally voted on January 24, 2018 to adopt the MassDOT Safety Performance Measures as described.

The safety measures MassDOT has established for CY 2018, and that Montachusett MPO has adopted, are as follows:

- 1. **Fatalities**: The target number of fatalities for years CY 2018 is 352.3, down from an average of 361 fatalities for the years 2011-2015. [See the following Table and Figure 1 for Montachusett MPO vs. statewide comparison of the trend for this performance measure]
- 2. Rate of Fatalities per 100 million VMT: The target fatality rate for years CY 2018 is 0.611, down from a 0.641 average for years 2011-2015. [See the following Table and Figure 1 for Montachusett MPO vs. statewide comparison of the trend for this performance measure]
- 3. **Serious Injuries**: The target number of serious injuries for CY2018 is 2,895.9, down from the average of 3,251.8 for years 2011-2015. [See the following Table and Figure 2 for Montachusett MPO vs. statewide comparison of the trend for this performance measure]
- 4. **Rate of Serious Injuries per 100 million VMT**: The target serious injury rate for CY2018 is 5.01 per year, down from the 5.78 average rate for years 2011-2015. [See the following Table and Figure 2 for Montachusett MPO vs. statewide comparison of the trend for this performance measure]
- 5. **Total Number of Combined Serious Injuries and Fatalities for Non-Motorized Modes**: The CY2018 target number of fatalities and serious injuries for non-motorists is 540.8 per year, the same as the average for years 2011-2015. [See the following Table and Figure 3 for Montachusett MPO vs. statewide comparison of the trend for this performance measure]

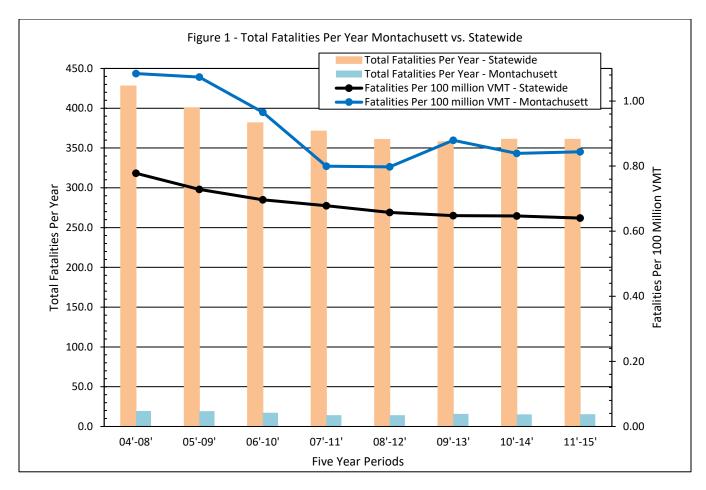

| Safety Trends and Rates Compariso | on of Statewide vs | Montachusett MPO |

Source of Data: MassDOT, Office of Transportation Planning

Source of Data: MassDOT, Office of Transportation Planning

In addition to the Safety Measures (PM 1), it is anticipated that the following performance measures which were implemented by FHWA and targets set by MassDOT will be presented to the MPO in the coming months.

- Pavement and Bridge Condition Measures (PM 2)
- Performance of NHS, Freight and CMAQ Measures (PM 3)

Targets established by MassDOT in reference to PM 2 and PM 3 may then be adopted by the MPO, or the MPO may adopt its own targets.

Transit Asset Management

In July 2016, FTA published a Final Rule for Transit Asset Management. The rule requires FTA grantees to develop asset management plans for their public transportation assets, including vehicles, facilities, equipment, and other infrastructure.

In 2012, the Moving Ahead for Progress in the 21st Century Act (MAP-21) mandated, and in 2015 the Fixing America's Surface Transportation Act (FAST) reauthorized, FTA to develop a rule to establish a strategic and systematic process of operating, maintaining and improving public transportation capital assets effectively through their entire life cycle. FTA's national Transit Asset Management System Rule:

- Defines "state of good repair"
- Requires grantees to develop a TAM plan
- Establishes performance measures
- Establishes annual reporting requirements to the National Transit Database
- Requires FTA to provide technical assistance

TAM requirements in this final rule are part of a larger performance management context. MAP-21 created a performancebased and multimodal program to strengthen the U.S. transportation system, which is comprised of a series of nine rules overseen by FTA and the Federal Highway Administration (FHWA). FTA is tasked with developing other rules, including the National Public Transit Safety Plan and the Public Transportation Agency Safety Plan, and has worked jointly with FHWA on a rule to manage Statewide and Metropolitan Planning.

The Montachusett Regional Transit Authority (MART) has been working to develop a TAM. Data collection is near completion and the plan is expected to be available on or around July 1, 2018. The Montachusett MPO will adopt targets in the following categories sometime in the fall of 2018:

- Rolling Stock and Equipment
- Facilities
- Infrastructure

TRANSPORTATION FUNDING PROGRAMS

Description of Highway Programs

Federal Aid is received by the State as reimbursement, and the State is required to contribute a matching share to most projects receiving Federal funds.

The FAST Act has generally maintained the program structure of MAP-21 that had combined several activities previously carried out under existing formula programs into a new core formula program structure. The FAST Act includes the following:

- National Highway Performance Program (NHPP)
- Surface Transportation Block Grant Program (STBGP)
- Highway Safety Improvement Program (HSIP)
- Railway-Highway Grade Crossings Program
- Congestion Mitigation and Air Quality Improvement Program (CMAQ)
- National Highway Freight Program (NHFP)
- STBGP Set-Aside (formerly the Transportation Alternatives Program (TAP))

This TIP includes projects funded under these programs as well as potentially carried over programs from prior federal authorizations such as High Priority Program (HPP) funds.

All of the programs listed are administered by the MassDOT. A project may be initiated by MassDOT or the local community. If approved, the project is submitted to Federal Highway Administration for funding. A description of each of these programs follows:

- <u>National Highway Performance Program (NHPP)</u>: The enhanced National Highway Performance Program (NHPP) is composed of rural and urban roads serving major population centers, international border crossings, intermodal transportation facilities, and major travel destinations. It includes the Interstate System, all principal arterials (including some not previously designated as part of the NHS) and border crossings on those routes, highways that provide motor vehicle access between the NHS and major intermodal transportation facilities, and the network of highways important to U.S. strategic defense (STRAHNET) and its connectors to major military installations. The funding split for this program is generally 80% federal 20% state.
- <u>Surface Transportation Block Grant Program (STBGP)</u>: The FAST Act converts the long-standing Surface Transportation Program into the Surface Transportation Block Grant Program acknowledging that this program has the most flexible eligibilities among all Federal-aid highway programs and aligning the program's name with how FHWA has historically administered it. The STBG promotes flexibility in State and local transportation decisions and provides flexible funding to best address State and local transportation needs. As under MAP-21, the FAST Act directs FHWA to apportion funding as a lump sum for each State then divide that total among apportioned programs. Each State's STBG apportionment is calculated based on a percentage specified in law. The funding split for this program is generally 80% federal 20% state.
- <u>Highway Safety Improvement Program (HSIP)</u>: The FAST Act continues the Highway Safety Improvement Program (HSIP) to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-

State-owned public roads and roads on tribal lands. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. The funding split is 90% federal and 10% state.

- <u>Congestion Mitigation and Air Quality (CMAQ)</u>: The CMAQ program is continued in the FAST Act to provide a flexible funding source to State and local governments for transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide, or particulate matter (nonattainment areas) and for former nonattainment areas that are now in compliance (maintenance areas). The funding split for this program is generally 80% federal 20% state.
- <u>STBGP Set-Aside</u>: The FAST Act eliminates the MAP-21 Transportation Alternatives Program (TAP) and replaces it with a set-aside of Surface Transportation Block Grant (STBG) program funding for transportation alternatives (TA). These set-aside funds include all projects and activities that were previously eligible under TAP, encompassing a variety of smaller-scale transportation projects such as pedestrian and bicycle facilities, recreational trails, safe routes to school projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity. The funding split for this program is generally 80% federal 20% state.
- <u>Nationally Significant Freight & Highway Projects (NSFHP) Program</u>: The FAST Act establishes the NSFHP program to provide financial assistance through competitive grants known as FASTLANE grants or credit assistance to nationally and regionally significant freight and highway projects that align with the program goals, i.e. improve safety, efficiency and reliability, generate economic benefits, reduce highway congestion and bottlenecks, improve freight connectivity, enhance the resiliency of critical highway infrastructure, improve roadways vital to national energy security, and address the impacts of population growth on freight and people movement. The funding split is generally 60% federal and 40% other sources. An additional 20% may be funded with other federal assistance dollars.
- <u>High Priority Projects:</u> This program provides designated funding for specific projects identified in SAFETEA-LU. Projects are identified with a specified amount of funding over the 5 years of SAFETEA-LU. The funds designated for a project are available only for that project until expended. HPP projects are fully funded and are included on the TIP when they are expected to be "ready to go." The funding split is 80% federal and 20% state.

FAST Act funding information from FHWA Fact Sheets found at the FAST Act website: <u>http://www.fhwa.dot.gov/fastact/factsheets/index.cfm</u>

Glossary of Terms

The terms used in the main part of this TIP are defined as follows:

- <u>MassDOT Project ID</u>: indicates Massachusetts Department of Transportation Highway Division Project Identification Number.
- <u>MassDOT Project Description</u>: indicates the city or town in which the project is to be implemented and gives details of the type of work to be performed and specific locations.
- <u>MassDOT District</u>: indicates in which MassDOT Highway Division District of the Montachusett Region the project occurs. The communities in the MRPC Region fall within District 2, with offices in Northampton, and District 3, with offices in Worcester.

- <u>Funding Source</u>: indicates funding program under which the project is eligible for dollar allocations, such as National Highway Performance Program or Surface Transportation Block Grant Program.
- <u>Total Programmed Funds, Federal Funds, Non-Federal Funds</u>: presented for each project for each fiscal year are estimated total costs and the source/share of the funds, i.e. Federal or State. Projects where costs and activity are not available will be labeled NA.
- <u>Additional Information</u>: indicates information pertinent to the project in order to provide the reader with a more detail look at the project. This includes, if applicable: a) Planning / Design / or Construction; b) total project cost and funding sources used; c) advance construction status; d) MPO project TEC score; e) name of entity receiving a transfer; f) name of entity paying the non-state non-federal match; g) earmark details; h) TAP project proponent; i) other information such as the current cost of the project (in Year 1 dollars) and the Year of Expenditure (YOE) cost based on the inflation factor for that year (i.e. Year 2 YOE increase of 4%; Year 3 YOE increase of 8%; Year 4 YOE increase of 12%; and Year 5 YOE increase of 16%).

Description of Transit Funding Programs

The FAST Act supports transit funding through fiscal year 2020, reauthorizes FTA programs and includes changes to improve mobility, streamline capital project construction and acquisition, and increase the safety of public transportation systems across the country. Discretionary and Formula funds are also available. Formula grant programs are funded to States based on formulas of population. Each grant program is referred to by name and usually by a number that correlates to the section number of the authorization.

Formula Grants

- <u>Urbanized Area Formula Program (5307) Funds</u>: This formula program makes funds available on the basis of a statutory formula to all urbanized areas in the country. Eligible activities are capital projects, planning and job access/reverse commute projects. Operating assistance is continued as an eligible expense under Section 5307. Operating assistance caps are now in place for urbanized areas over 200,000 but operating fewer than 100 buses (no rail), not just those under 200,000 (as determined by the U.S. Census Bureau), as is the case in previous law.
- <u>Transportation for Elderly Persons and Persons with Disabilities (5310) Funds</u>: This program provides capital funding for transportation services for elderly and disabled persons. Authorization under MAP-21 has moved the formula allocation from a single statewide allocation to an Urbanized Area allocation. The funds may go to private, non-profit organizations or to public bodies which coordinate service. Also funds available to our area are in a single allocation with two other "Small Urban" areas, therefore MassDOT has made all the apportioned funds a competitive application. No less than 55% of these funds must be used for capital projects. Up to 45% may be used for operating assistance projects that would formerly been eligible under New Freedom funds. No more than 10% may be used be a recipient for Administrative Expenses associated with a project. The Rail and Transit Division of the Massachusetts Department of Transportation through the State Transportation Bond authorization program, makes capital grants available through its Mobility Assistance Program to public agencies to purchase vehicles and related equipment for transporting elderly and disabled persons.
- <u>Formula Grants for Other than Urbanized Areas (5311) Funds</u>: program provides capital, planning, and operating assistance to states to support public transportation in rural areas with populations of less than 50,000, where many residents often rely on public transit to reach their destinations. The program also provides funding for state and national training and technical assistance through the Rural Transportation Assistance Program. States must spend at least 15% of its annual apportionment for the development and support of intercity bus transportation, unless it

can certify, after consultation with intercity bus service providers, that the intercity bus needs of the state are being adequately met.

- <u>Bus and Bus Facilities (5339) Funds</u>: This program provides capital assistance for new and replacement buses, related equipment, and facilities. These funds have both a formula-based program by urbanized area and a competitive discretionary program. As with the 5310 formula, 5339 is apportioned to our region via the state thru an allocation for "Small Urban," with a statewide allocation as well. Therefore, a competitive process thru MassDOT has been established for the 3-small urban and 3 rural RTA's to obtain these funds. The Federal share of eligible capital costs is no more than 80 percent of the net capital project cost. MART can also apply as a direct recipient when discretionary funds are released via a Notice of Funding Availability (NOFA) by USDOT/FTA.
- <u>State of Good Repair Formula Grants (5337)</u>: Eligible recipients are state and local government authorities in urbanized areas with fixed guideway public transportation facilities operating for at least 7 years. The Montachusett Regional Transit Authority is not an eligible recipient since there is not currently any fixed guideway or high-speed motorbus operated under the authority.

Discretionary Grants

The Federal Transit Administration and the U.S. Department of Transportation still have a few discretionary grant programs that MART is eligible to apply under. A Notice of Funding Availability (NOFA) is published in the Federal Register each year stating program amounts and instructions for applying for these Competitive grants. Please see FTA's website for more details at http://www.fta.dot.gov/grants/15926.html.

- <u>Capital Investment Grants (5309)</u>: This is FTA's primary grant program for funding major transit capital investments, including heavy rail, commuter rail, light rail, streetcars, and bus rapid transit. It is a discretionary grant program unlike most others in government. Instead of an annual call for applications and selection of awardees by the Federal Transit Administration (FTA), the law requires that projects seeking CIG funding complete a series of steps over several years to be eligible for funding. For New Starts and Core Capacity projects, the law requires completion of two phases in advance of receipt of a construction grant agreement Project Development and Engineering. For Small Starts projects, the law requires completion of one phase in advance of receipt of a construction grant agreement Project Development. The law also requires projects to be rated by FTA at various points in the process according to statutory criteria evaluating project justification and local financial commitment.
- <u>TIGER (USDOT)</u>: The Transportation Investment Generating Economic Recovery, or TIGER Discretionary Grant program, provides a unique opportunity for the U.S. Department of Transportation to invest in road, rail, transit and port projects that promise to achieve critical national objectives. The TIGER program enables DOT to use a rigorous process to select projects with exceptional benefits, explore ways to deliver projects faster and save on construction costs, and make investments in our Nation's infrastructure that make communities more livable and sustainable.
- Low or No Emission Vehicle Deployment Program (5339 c): The main purpose of the LoNo Program is to deploy the cleanest and most energy efficient U.S.-made transit buses that have been largely proven in testing and demonstrations but are not yet widely deployed in transit fleets. The LoNo Program provides funding for transit agencies for capital acquisitions and leases of zero emission and low-emission transit buses, including acquisition, construction, and leasing of required supporting facilities such as recharging, refueling, and maintenance facilities.

- <u>Public Transportation Innovative and other Research & Technology Programs 5312</u>: Under the FAST Act there are currently 3 programs eligible under 5312 research/demonstration funds. All of them have the same goal of providing funding to develop innovative products and services assisting transit agencies in better meeting the needs of their customers.
- <u>Pilot Program for Transit-Oriented Development Planning 5309</u>: helps support FTA's mission of improving public transportation for America's communities by providing funding to local communities to integrate land use and transportation planning with a transit capital investment that is seeking or recently received funding through the <u>Capital Investment Grant (CIG) Program</u>. Comprehensive planning funded through the program must examine ways to improve economic development and ridership, foster multimodal connectivity and accessibility, improve transit access for pedestrian and bicycle traffic, engage the private sector, identify infrastructure needs, and enable mixed-use development near transit stations.

STATE POLICIES AND DIRECTIVES

GreenDOT

GreenDOT is the Massachusetts Department of Transportation's sustainability initiative. It is designed to support the implementation of the following state laws.

- Climate Protection and Green Economy Act (Mass. Gen. L. c. 21N)
- Green Communities Act (Chapter 169 of the Acts of 2008)
- Healthy Transportation Compact (section 33 of Chapter 25 of the Acts of 2009)
- Leading by Example (Executive Order of Governor Patrick, no. 488)
- MassDOT's youMove Massachusetts planning initiative
- The "Complete Streets" design standards of the 2006 MassDOT Highway Division Project Development and Design Guide, as amended

The GreenDOT initiative incorporates three main goals:

- 1. Reduce greenhouse gas (GHG) emissions
- 2. Promote the healthy transportation modes of walking, bicycling, and public transit
- 3. Support smart growth development

Through the GreenDOT policy, MassDOT will seek to "promote sustainable economic development, protect the natural environment, and enhance the quality of life for all the Commonwealth's residents and visitors."

Mode Shift Goals

As part of implementation plan for GreenDOT, in October 2012 MassDOT announced a "Mode Shift" goal designed to reduce the number of individuals travelling by alone by automobile.

The Mode Shift goals are measured in Personal Miles Traveled (PMT) and are as follows:

| MA Mode Shift Goals - Personal Miles Traveled (PMT) | | | | | | | |
|---|----------------------|-------------|-------------|--------------|--|--|--|
| Year | Bicycling PMT | Transit PMT | Walking PMT | <u>Total</u> | | | |
| 2010 (baseline) | 150.4m | 1.83b | 101.1m | 2.08b | | | |
| 2020 (benchmark) | 330.0m | 3.99b | 223.9m | 4.55b | | | |
| 2030 (goal year) | 516.0m | 5.93b | 333.6m | 6.78b | | | |

Source: http://transportation.blog.state.ma.us/blog/2012/12/massdot-goal-triple-bicycling-transit-walking.html

weMove Massachusetts

MassDOT released weMove Massachusetts (WMM): Planning for Performance, the Commonwealth of Massachusetts' 2040 Long-Range Transportation Plan (LRTP) in May of 2014. This plan includes seven major components:

- 1. Transportation Reform emphasis on customers, innovation, accountability, performance management, efficiency, stewardship and stronger collaboration across transportation divisions;
- 2. Data and Analysis critical to sound decision making;
- 3. Transportation System Needs Identification to help choose the right transportation investments;
- 4. youMove Massachusetts Themes ten value statements that capture the diverse values users;
- 5. Customer and Stakeholder Engagement- incorporate the priorities of customers and stakeholders;
- 6. Statewide Transportation Plans- implement modal plans;
- 7. Statewide Priorities and Policies- ensure accountability.

Source: https://massmoves.org/resource/wemove-massachusetts-planning-for-performance/

The policies of the Commonwealth will be reviewed, considered and incorporated in the planning studies developed as part of the work tasks outlined in this UPWP. Recommendations derived from these studies will be consistent with state policies.

Healthy Transportation Policy Directive

On September 20, 2013, MassDOT announced the Healthy Transportation Policy Directive designed to increase bicycling, transit and walking options. The directive is intended to promote multimodal access for users of the transportation networks and systems.

The Healthy Transportation Directive builds upon the goals established under MassDOT's GreenDOT Implementation Plan and mode shift goal. The Directive requires all MassDOT Districts to review all projects under design to "ensure they are consistent with ...goals."

Elements included in the Directive are as follows:

All MassDOT facilities will consider adjacent land uses and be designed to include wider sidewalks, landscaping, crossing opportunities and other features to enhance healthy transportation options;

Reviews will be conducted of cluster sites where incidents have occurred with healthy transportation users; MassDOT will develop a guide to assist communities proposing Shared Use Paths on or along rail beds in order to accelerate the path design process.

Additional information on the Healthy Transportation Policy Directive and MassDOT's GreenDOT comprehensive environmental responsibility and sustainability initiative can be viewed at https://www.mass.gov/files/documents/2016/11/pf/greendot.pdf.

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects

701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public Works Project that is performed within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Awarding Authority.

For all projects contained in the TIP, the Commonwealth is the Awarding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines.

By placing a project on the TIP, the Municipality acknowledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation.

This information and additional information relative to guidance and implementation of the Regulation can be found by contacting the MassDOT Highway Division. (<u>www.massdot.state.ma.us/highway/Main.aspx</u>)

SUMMARY OF PROGRAMMED FUNDS BY FUNDING CATEGORY

The following table and chart present a summary of total funds programmed within the Montachusett Region by funding category for each federal fiscal year of this TIP. All figures presented represent the total project costs, i.e. federal/state/local amounts combined, for that particular funding category.

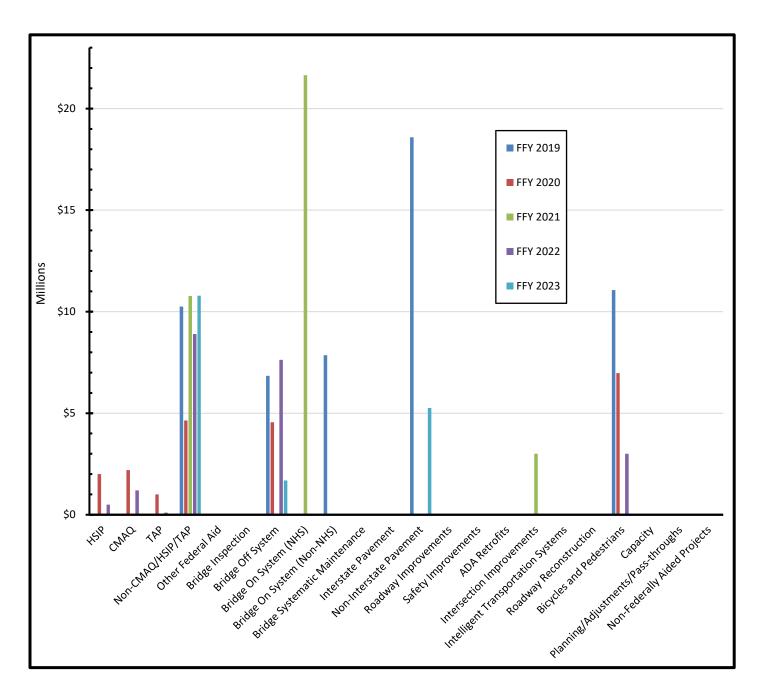

SUMMARY OF PROGRAMMED FUNDS BY FUNDING CATEGORY - HIGHWAY

| | | | | | | Total |
|------------------------------------|--------------|--------------|--------------|--------------|--------------|---------------|
| Funding Category | FFY 2019 | FFY 2020 | FFY 2021 | FFY 2022 | FFY 2023 | FFY 2019- |
| | | | | | | 2023 |
| HSIP | \$0 | \$2,000,000 | \$0 | \$500,000 | \$0 | \$2,500,000 |

NOTE: All funding amounts listed are Total costs that include federal and matching non-federal funds.

SUMMARY OF PROGRAMMED FUNDS BY FUNDING CATEGORY - HIGHWAY

FEDERAL REQUIREMENTS

Financial Plan for the FFY 2019-2023 Transportation Improvement Program Montachusett MPO

The financial plan contained herein is financially constrained and indicates that the Montachusett Metropolitan Planning Organization Transportation Improvement Program (TIP) reflects the highway program emphasis on the maintenance and operation of the current roadway and bridge system with the ability to provide for additional capital improvements. Only projects for which funds can be expected have been included.

The following table compares anticipated federal target funds (Federal \$ (M) Target/Availability) to the federal funds for those projects programmed in each Fiscal Year (Federal \$ (M) Programmed). For each fiscal year, programmed funds do not exceed anticipated target funds.

1. Moneys do not include statewide federal aid or Regional "Mega" projects which are programmed but are excluded from the regional targets provided to MRPC.

2. FTA Programmed amounts are Federal dollars only and do not include state or local shares.

Major Expansion or Other Capital Projects

MART is involved in one major and other minor capital building projects:

- 1. Ayer Commuter Rail Parking Facility with Kiss-and-Ride Drop-off/Bus Stop.
- 2. Infrastructure improvements/replacements to our ITS system components.
- 3. Infrastructure improvements to our ageing Fitchburg facilities.

Operating vs Capital Expenditures

For the purposes of this table, operating projects under the Highway section are considered those projects that maintain the operation of existing facilities or infrastructure, i.e. resurfacing/rehabilitation of road surfaces, rehabilitation/replacement of a bridge, intersection geometrics, etc. Capital projects are assumed to be those projects that involve the construction of a new facility to the transportation network.

In the case of the Highway Element of this TIP, two projects were considered to be capital expenditures. One project occurs in FFY 2019 and 2020, project #608193 Fitchburg/Leominster Twin City Rail trail through Advanced Construction funding. In FFY 2022, one project is considered capital, project #607347 Gardner North Central Pathway Construction Phase VI.

On the Transit side, capital projects were assumed to include rehabilitation/renovation projects on existing transit facilities.

| FFY | | Highway (Fed & NFA) | Transit (Fed & NFA) | Total | Percent of Total |
|------|-----------|------------------------|------------------------|--------------|---------------------|
| 2019 | Operating | \$43,542,188 | \$4,575,000 | \$48,117,188 | 79.25% |
| | Capital | \$11,059,443 | \$1,542,119 | \$12,601,562 | 20.75% |

AIR QUALITY CONFORMITY INFORMATION - MONTACHUSETT METROPOLITAN PLANNING ORGANIZATION - FFY 2019-2023 TRANSPORTATION IMPROVEMENT PROGRAM

Since most all of Massachusetts (with limited exceptions) was designated on 5/21/12 by the United States Environmental Protection Agency as "unclassifiable/attainment" for the latest ozone standard, a conformity determination for the Montachusett 2019-23 TIP is not required. Further details and background information are provided below:

Introduction

The 1990 Clean Air Act Amendments (CAAA) require metropolitan planning organizations within nonattainment and maintenance areas to perform air quality conformity determinations prior to the approval of Long-Range Transportation Plans (LRTPs) and Transportation Improvement Programs (TIPs), and at such other times as required by regulation. A nonattainment area is one that the U.S. Environmental Protection Agency (EPA) has designated as not meeting certain air quality standards. A maintenance area is a nonattainment area that now meets the standards and has been re-designated as maintaining the standard. A conformity determination is a demonstration that plans, programs, and projects are consistent with the State Implementation Plan (SIP) for attaining the air quality standards. The CAAA requirement to perform a conformity determination ensures that federal approval and funding go to transportation activities that are consistent with air quality goals.

The entire Commonwealth of Massachusetts was previously classified as nonattainment for ozone and was divided into two nonattainment areas. The Eastern Massachusetts ozone nonattainment area included Barnstable, Bristol, Dukes, Essex, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk, and Worcester counties. Berkshire, Franklin, Hampden, and Hampshire counties comprised the Western Massachusetts ozone nonattainment area. With these classifications, the 1990 Clean Air Act Amendments (CAAA) required the Commonwealth to reduce its emissions of volatile organic compounds (VOCs) and nitrogen oxides (NOx), the two major precursors to ozone formation to achieve attainment of the ozone standard.

Legislative and Regulatory Background

The 1970 Clean Air Act defined a one-hour national ambient air quality standard (NAAQS) for ground-level ozone. The 1990 CAAA further classified degrees of nonattainment of the one-hour standard based on the severity of the monitored levels of the pollutant. The entire commonwealth of Massachusetts was classified as being in serious nonattainment for the one-hour ozone standard, with a required attainment date of 1999. The attainment date was later extended, first to 2003 and a second time to 2007.

In 1997, the EPA proposed a new, eight-hour ozone standard that replaced the one- hour standard, effective June 15, 2005. Scientific information had shown that ozone could affect human health at lower levels, and over longer exposure times than one hour. The new standard was challenged in court, and after a lengthy legal battle, the courts upheld it. It was finalized in June 2004. The eight-hour standard is 0.08 parts per million, averaged over eight hours and not to be exceeded more than once per year. Nonattainment areas were again further classified based on the severity of the eight-hour values. Massachusetts as a whole was classified as being in moderate nonattainment for the eight-hour standard and was separated into two nonattainment areas—Eastern Massachusetts and Western Massachusetts.

In March 2008, EPA published revisions to the eight-hour ozone NAAQS establishing a level of 0.075 ppm, (March 27, 2008; 73 FR 16483). In 2009, EPA announced it would reconsider this standard because it fell outside of the range recommended by the Clean Air Scientific Advisory Committee. However, EPA did not take final action on the reconsideration so the standard would remain at 0.075 ppm.

After reviewing data from Massachusetts monitoring stations, EPA sent a letter on December 16, 2011 proposing that only Dukes County would be designated as nonattainment for the new proposed 0.075 ozone standard. Massachusetts concurred with these findings.

On May 21, 2012, (77 FR 30088), the final rule was published in the Federal Register, defining the 2008 NAAQS at 0.075 ppm, the standard that was promulgated in March 2008. A second rule published on May 21, 2012 (77 FR 30160), revoked the 1997 ozone NAAQS to occur one year after the July 20, 2012 effective date of the 2008 NAAQS.

Also, on May 21, 2012, the air quality designations areas for the 2008 NAAQS were published in the Federal Register. In this Federal Register, the only area in Massachusetts that was designated as nonattainment is Dukes County. All other Massachusetts counties were classified as unclassifiable/attainment.

Therefore, conformity for ozone in the Montachusett MPO is required until July 20, 2013 for only the 1997 ozone standard. Since this 2019-23 TIP will complete its collective development, review, and approval by the Federal Highway Administration after July 20, 2013 – when this standard will be revoked, and since the latest area designations to do not require conformity under the current 2008 standard, the MPO does not need to perform a conformity determination for ozone on the program.

TRANSPORTATION AND TRANSIT PROJECT PRIORITIES: FEDERAL & STATE SECTIONS

Please note that the projects listed represent the best available information at the time of compilation. Actual implementation is subject to right of way, design, land taking, local action and/or other issues that could delay project time frames and subsequently advertising and award dates.

In addition, federal guidance requires that the TIP reflect Year of Expenditure (YOE) dollars for projects and programs. To accommodate this requirement, individual project cost estimates provided by MassDOT have been adjusted by a four percent per year inflation factor depending upon its year of placement in the TIP (for this TIP, Federal Years 2020, 2021, 2022 and 2023). Year 1 cost estimates remain as provided but projects in Year 2, 3, 4 or 5 (i.e. FFY 2020, 2021, 2022 or 2023) have been increased by a YOE factor of 4%, 8%, 12% or 16%, respectively.

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project store at the Impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Aw arding Authority. For all projects contained in the TP, the Commonw ealth is the Aw arding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TP, the Municipality acknow ledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information relative to guidance and implementation of the Regulation and construction will be fully compliant with this Regulation. This information relative to guidance and implementation of the Regulation and additional information relative to guidance and implementation of the Regulation of the Regulation and expression webite. http://www.messdot.state.ma.us/Hghw ay/flaggers/main.aspx

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project store of the timps of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Aw arding Authority. For all projects contained in the TP, the Commonw ealth is the Aw arding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknow ledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information relative to guidance and implementation of the Regulation and the follow with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation of the Regulation of the Regulation of the Regulation are follow with the MassDOT Highway Division website: http://www.massdot.state.ma.us/Highway/Haggers/main.aspx

701 CMR 7.00 Use of Road Flaggers and Police Details on Public Works Projects / 701 CMR 7.00 (the Regulation) was promulgated and became law on October 3, 2008. Under this Regulation, the CMR is applicable to any Public works Project store within the limits of, or that impact traffic on, any Public Road. The Municipal Limitation referenced in this Regulation is applicable only to projects where the Municipality is the Aw arding Authority. For all projects contained in the TP, the Commonw ealth is the Aw arding Authority. Therefore, all projects must be considered and implemented in accordance with 701 CMR 7.00, and the Road Flagger and Police Detail Guidelines. By placing a project on the TIP, the Municipality acknow ledges that 701 CMR 7.00 is applicable to its project and design and construction will be fully compliant with this Regulation. This information relative to guidance and implementation of the Regulation and the follow with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation of the Regulation of the Regulation and the follow with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation of the Regulation and the follow with this Regulation. This information, and additional information relative to guidance and implementation of the Regulation and the follow with this Regulation.

APPENDIX C – 2019 – 2023 TIP GREENHOUSE GAS MONITORING AND EVALUATION

Introduction

This section summarizes the greenhouse gas (GHG) impacts that are anticipated to result from the projects that are included in this FFY 2019 – 2023 Transportation Improvement Program (TIP). It includes a summary of the state laws and policies that call for reducing greenhouse gas in order to mitigate global climate change, actions that are being to respond to these state laws and policies, the role of regional planning and TIP development in reducing GHG emission and tracking these reductions, and the projected GHG emission impacts from the projects programmed in the TIP.

State Policy Context

The Global Warming Solutions Act (GWSA), which was signed into law in August 2008, makes Massachusetts a leader in setting aggressive and enforceable GHG reduction targets, and implementing policies and initiatives to achieve these targets. In keeping with the law, on December 29, 2010 the Massachusetts Executive Office of Energy and Environmental Affairs (EOEEA), in consultation with other state agencies and the public, released the Massachusetts *Clean Energy and Climate Plan for 2020*. In December 2014, the Department of Environmental Protection issued new regulations that require Metropolitan Planning Organizations to quantify impacts from project investments, track progress towards reductions, and consider impacts in the prioritization of GHG impacts from project investments. The targets for overall statewide GHG emissions are:

- By 2020: 25 percent reduction below statewide 1990 GHG emission levels
- By 2050: 80 percent reduction below statewide 1990 GHG emission levels

GreenDOT Policy

The transportation sector is the single largest emitter of greenhouse gases, accounting for over a third of GHG emissions, and therefore the transportation sector is a key focus of the *Clean Energy and Climate Plan*. MassDOT's approach to supporting the implementation of the plan is set forth in its GreenDOT Policy Directive, a comprehensive sustainability initiative that sets three principal objectives:

- **Reduce greenhouse gas (GHG) emissions.** MassDOT will achieve this by taking GHG emissions into account in all of its responsibilities, from strategic planning to project design and construction and system operations.
- **Promote the healthy transportation modes of walking, bicycling, and public transit.** MassDOT will achieve this by pursuing multi-modal, "complete streets" design standards; providing choice in transportation services; and by working with MPOs and other partners to prioritize and program a balance of projects that serve drivers, pedestrians, bicyclists, and public transit riders.
- **To support smart growth development.** MassDOT will achieve this by working with MPOs and other partners to make transportation investments that enable denser, smart growth development patterns that support reduced GHG emissions.

GreenDOT Policy and Metropolitan Planning Organizations

The Commonwealth's thirteen metropolitan planning organizations (MPOs) are integrally involved in helping to achieve the GreenDOT goals and supporting the GHG reductions mandated under the GWSA. The MPOs are most directly involved in helping to achieve the GHG emissions reductions under the second goal – to promote healthy transportation modes through prioritizing and programming an appropriate balance of roadway, transit, bicycle and pedestrian investments – and assist in the third goal by supporting smart growth development patterns through the creation of a balanced multi-modal transportation system. This will be realized through the transportation goals and policies espoused in the 2016 Regional Transportation Plans (RTPs), the major projects planned in the RTPs, and the mix of new transportation projects that are programmed and implemented through the TIPs. The GHG tracking and evaluation processes enable the MPOs to identify the anticipated GHG impacts of the planned and programmed projects, and also to use GHG impacts as a criterion in prioritizing transportation projects.

Regional GHG Tracking and Evaluation in RTPs

MassDOT coordinated with MPOs and regional planning agency (RPA) staffs on the implementation of GHG tracking and evaluation in development of each MPO's 2035 RTPs, which were adopted in September 2011. This collaboration has continued for the MPO's 2040 RTPs and 2019-23 TIPs.

Working together, MassDOT and the MPOs have attained the following milestones:

- Modeling and long-range statewide projections for GHG emissions resulting from the transportation sector. Using the Boston MPO's regional model and the statewide travel demand model for the remainder of the state, GHG emissions were projected for 2020 no-build and build conditions, and for 2040 no-build and build conditions.
- All of the MPOs included these GHG emission projections in their RTPs, along with a discussion of climate change and a statement of MPO support for reducing GHG emissions as a regional goal.

Project-Level GHG Tracking and Evaluation in the Transportation Improvement Program

It is also important to monitor and evaluate the GHG impacts of the transportation projects that are programmed in the MPO Transportation Improvement Programs (TIP). The TIP includes both the larger, regionally-significant projects from the RTPs, which have already had their aggregate GHG impacts calculated and reported in the RTP, as well as smaller projects that are not included in the RTP but that may nevertheless have impacts on GHG emissions. The principal objective of this tracking is to enable the MPOs to evaluate expected GHG impacts of different projects and to use this information as a criterion for prioritizing and programming projects in future TIPs.

In order to monitor and evaluate the GHG impacts of TIP projects, MassDOT and the MPOs have developed the following approach for identifying anticipated GHG impacts and quantifying GHG impacts of projects, when appropriate, through the TIP. Different types of projects will have different anticipated GHG emissions impacts. The different project categories are outlined on the next two pages with this region's project tracking sheet on the third page.

Calculation of GHG Impacts for TIP Projects

The Office of Transportation Planning at MassDOT provided the spreadsheets that are used for determining Congestion Management and Air Quality Improvement (CMAQ) eligibility. These spreadsheets require the same inputs as the CMAQ calculations and have been adapted to provide CO₂ impacts. The data and analysis required for these calculations is available from functional design reports that should be submitted for projects that would produce a measurable GHG impact.

- Projects with Quantified Impacts
 - RTP Projects Major capacity expansion projects would be expected to have a significant impact on GHG emissions.
 However, these projects are included in the RTPs and analyzed using the statewide model or Boston regional model, which would reflect their GHG impacts. Therefore, no independent TIP calculations are required.
 - Quantified Decrease in Emissions Projects that would be expected to produce a measurable decrease in emissions. The approach for calculating these impacts is described below. These projects should be categorized in the following manner:
 - Quantified Decrease in Emissions from Traffic Operational Improvement An intersection reconstruction or signalization project that is projected to reduce delay and congestion.
 - Quantified Decrease in Emissions from Pedestrian and Bicycle Infrastructure A shared-use path that would enable increased walking and biking and decreased vehicle-miles traveled (VMT).

- Quantified Decrease in Emissions from New/Additional Transit Service A bus or shuttle service that would enable increased transit ridership and decreased VMT
- Quantified Decrease in Emissions from a Park and Ride Lot A park-and-ride lot that would enable increased transit ridership/ increased ridesharing and decreased VMT
- Quantified Decrease in Emissions from Bus Replacement A bus replacement that would directly reduce GHG emissions generated by that bus service.
- Quantified Decrease in Emissions from Complete Streets Improvements Improvements to roadway networks that include the addition of bicycle and pedestrian accommodations where none were present before.
- Quantified Decrease in Emissions from Other Improvement
- Quantified Increase in Emissions Projects that would be expected to produce a measurable increase in emissions.
- Projects with Assumed Impacts
 - No Assumed Impact/Negligible Impact on Emission Projects that do not change the capacity or use of a facility (e.g. a resurfacing project that restores a roadway to its previous condition, or a bridge rehabilitation/replacement that restores the bridge to its previous condition) would be assumed to have no GHG impact.
 - Assumed Nominal Decrease in Emissions Projects that would be expected to produce a minor decrease in emissions that cannot be calculated with any precision. Examples of such projects include roadway repaving or reconstruction projects that add a new sidewalk or new bike lanes. Such a project would enable increased travel by walking or bicycling, but there may be not data or analysis to support any projections of GHG impacts. These projects should be categorized in the following manner:
 - Assumed Nominal Decrease in Emissions from Sidewalk Infrastructure
 - Assumed Nominal Decrease in Emissions from Bicycle Infrastructure
 - Assumed Nominal Decrease in Emissions from Sidewalk and Bicycle Infrastructure
 - Assumed Nominal Decrease in Emissions from Intelligent Transportation Systems (ITS) and/or Traffic Operational Improvements
 - Assumed Nominal Decrease in Emissions from Other Improvements
 - Assumed Nominal Increase in Emissions Projects that would be expected to produce a minor increase in emissions that cannot be calculated with any precision.

Regional Greenhouse Gas Impact Summary Tables for FFY 2019 – 2023 TIP

The following tables summarize the calculated quantitative and assumed qualitative impacts of the projects included in the regional FFY 2019 – 2023 TIP.

Highway Projects with GHG Emissions Analysis

| MassDOT Project ID | MassDOT Project Description | GHG Analysis Type | GHG Impact Description | GHG Impact by the Numbers Change in Summer CO2 Emissions (kilograms/year) |
|--------------------------|---|-------------------------|---|---|
| 608728 | WINCHENDON- RESURFACING & RELATED WORK ON ROUTE 202, FROM THE TEMPLETON TOWN LINE TO MAIN STREET (3.1 MILES) | Qualitative | No assumed impact/negligible impact on emissions | N/A |
| 604961 | CLINTON- RESURFACING & RELATED WORK ON ROUTE 110 (HIGH STREET) | Qualitative | No assumed impact/negligible impact on emissions | N/A |
| 607848 | HUBBARDSTON - RESURFACING & RELATED WORK ON ROUTE 68, FROM WILLIAMSVILLE ROAD TO THE GARDNER C.L. | Qualitative | No assumed impact/negligible impact on emissions | N/A |
| 607446 | WESTMINSTER- INTERSECTION IMPROVEMENTS, ROUTE 2A AT ROUTE 140 | Quantified | Quantified Increase in Emissions | 52,162 |
| 608260 | ATHOL- BRIDGE REPLACEMENT, A- 15-005, WASHINGTON AVE OVER ATHOL POND OUTLET | Qualitative | No assumed impact/negligible impact on emissions | N/A |
| 608259 | TOWNSEND- BRIDGE REPLACEMENT, T-07-013, WEST MEADOW ROAD OVER LOCKE BROOK | Qualitative | No assumed impact/negligible impact on emissions | N/A |
| 607127 | HUBBARDSTON- BRIDGE REPLACEMENT, H-24-009, EVERGREEN ROAD OVER MASON BROOK | Qualitative | No assumed impact/negligible impact on emissions | N/A |
| 608612 | ATHOL- BRIDGE REPLACEMENT, A- 15-008, CRESCENT STREET OVER MILLERS RIVER | Qualitative | No assumed impact/negligible impact on emissions | N/A |

ATTACHMENT 1 - COMMENTS RECEIVED ON DRAFT TIP

COMMENTS AND RESPONSES

| | MassDOT OTP Letter - comments in regards to narrative |
|-------------|---|
| | Please ensure that all tables are titled throughout the document. |
| | Page 13: On the second table, please correct the total for "TIP Project Investment" |
| | The narrative on federally required performance measures should include references to both the FTA required Transit Asset Management (TAM) Plan that will be completed by the RTAs by October 2018 and from which targets will be adopted by each MPO, and the FHWA required Transportation Asset Management Plan (TAMP) which is being developed by MassDOT to address pavement and bridge conditions on the NHS system |
| | Pages 24-27: Please specify that the data displayed on the tables corresponds to each of the graphs for the safety performance measures |
| Comment 1. | Page 25: Please revise the legend for the graphical version of Figure 1 to ensure that it matches the data and is consistent with Figure 2 |
| | Page 27: Please specify the data source used for non-motorized serious injuries and fatalities on the regional level |
| | Page 30: Please move the descriptions on federal transportation funding sources up to be in the same section as the bulleted list that enumerates these sources. |
| | Page 34: The links you have included for WeMoveMassachusetts and GreenDOT are no longer available. Please Update |
| | Pages 39 - 43: On each of the tables, please edit the typo for the line that should read "Total HSIP/CMAQ/TAP/STP." |
| | Page 36: Please adjust the alignment of the non-CMAQ/HSIP/TAP line. |
| Response 1. | Noted, changes and updates have been made throughout the narrative portion of the TIP |

| | MassDOT OTP Letter - Federal Highway Project Listing comments |
|-------------|---|
| | FFY 2019 |
| | 607848 - This project should be programmed at \$4,044,376 |
| | 604691 (Clinton) - Please revise the project number to 604961. Additionally, the Year of Expenditure Total Cost should be revised to \$2,436,388 |
| | FFY 2021 |
| Comment 2. | 608784 - Please increase the total programmed cost of this project to be \$2,409,474 with \$1,927,579 as federal funds and \$481,894 as non-federal funds. The current total programmed cost is based on a pre-25% project initiation cost. |
| | FFY 2022 |
| | Please add project 608850 (PETERSHAM- BRIDGE REPLACEMENT, P-08-002, GLEN VALLEY ROAD OVER EAST BRANCH OF SWIFT RIVER) to Section 2A under the Off-System Bridge Program. The total programmed funds should be \$4,569,936 with \$3,655,949 as federal funds and \$913,849 as non-federal funds. |
| | 609108 - The project number and title in the TIP are incorrect. Please revise to #609108 GARDNER- BIKE PATH BRIDGE CONSTRUCTION, NORTH CENTRAL PATHWAY OVER ROUTE 140 |
| Response 2. | Corrections and additions made to projects listed above. |

| | MassDOT OTP Letter - Greenhouse Gas Analysis comments |
|-------------|--|
| | FFY 2019 Highway |
| | Project 607446 should be quantified. |
| | FFY 2020 Highway |
| | Project 607431 should be a qualitative decrease. |
| | FFY 2021 Highway |
| | Project 608548 should be a qualitative decrease. |
| Comment 3. | FFY 2022 Highway |
| | Project 608891 should be a qualitative decrease. |
| | FFY 2023 Highway |
| | Project 601957 should be a qualitative decrease |
| | Project 608832 should be a quantified when enough information |
| | Project 609107 should be a qualitative decrease |
| | Completed Highway Projects |
| | It is only necessary to include completed projects with quantified impacts. |
| Response 3. | Appropriate changes made and analysis provided for the projects listed above |

| | Comment from the Town of Ashburnham via Email Project 601957 ASHBURNHAM - RESURFACING AND RELATED WORK ON ROUTE 101 | | | | | |
|-------------|---|--|--|--|--|--|
| Comment 4. | In reviewing the Transportation Improvement Program the Town of Ashburnham would like the MRPC and MassDOT to strongly consider moving this project MA DOT # 601957 from out of the TIP year 2023. This has been and ongoing project since 2009 and the town has now committed by contract in the amount of \$ 330,000 for the engineering portion with Weston & Sampson. Based on MASS DOT schedule and the time frame for this project the construction phase can begin in the Fall for 2020. | | | | | |
| Response 4. | Comment is noted. Monitoring of the progress of project #601957 will be ongoing and reconsidered during the development of future TIPs. | | | | | |
