

MONTACHUSETT COORDINATED PUBLIC TRANSIT - HUMAN SERVICES PLAN UPDATE

MPO ENDORSED

January 14, 2015

Prepared by

Prepared in cooperation with the Massachusetts Department of Transportation and the U.S. Department of Transportation. The views and opinions of the Montachusett Regional Planning Commission expressed herein do not necessarily state or reflect those of the Massachusetts Department of Transportation or the U.S. Department of Transportation.

The Montachusett MPO and the MRPC fully complies with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all programs and activities. The Montachusett MPO operates without regard to race, color, national origin, English Proficiency, ancestry, creed, income, gender, age and/or disability. Any person who believes him/herself or any specific class of persons, to be subject to discrimination prohibited by Title VI may by him/herself or by representative file a written complaint with the MRPC or the MMPO. Complaints are to be filed no later than 180 days from the date of the alleged discrimination. Please contact Glenn Eaton at 978-345-7376 ext. 310 for more information.

COORDINATED PUBLIC TRANSIT - HUMAN SERVICES PLAN UPDATE

**MPO ENDORSED
January 14, 2015**

Montachusett Coordinated Public Transit - Human Services Plan

Federal legislation requires that for those areas that wish to access certain funding programs, the Metropolitan Planning Organizations (MPO) must develop and update a Coordinated Public Transit - Human Services Transportation Plan (CPT-HST). The CPT-HST Update must reflect the federal legislation Moving Ahead for Progress in the 21st Century (MAP-21) and its provisions and requirements. The CPT-HST Plan documents the Montachusett Metropolitan Planning Organizations (MMPO) unmet human-service transportation needs of individuals with disabilities, low-income individuals (or persons below the poverty level) and the elderly.

The CPT-HST Plan has been developed by the MMPO as a tool to help local transportation providers and communities improve transportation services, increase efficiency of service delivery, and expand outreach to meet growing needs. It provides a framework to guide the investment of existing transportation resources and the acquisition of future funds.

The Montachusett MPO hereby endorses the Montachusett Coordinated Public Transit - Human Services Plan as prepared and after completion of a 30 day public review and comment period.

Frank DePaola, Acting Secretary and CEO

1. Introduction

Congress enacted MAP-21 (Moving Ahead for Progress in the 21st Century Act) on July 6, 2012, replaces SAFETEA-LU (the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users) as the federal legislation that funds surface transportation, with most policy provisions taking effect on October 1, 2012.

SAFETEA-LU established that agencies receiving funding from any of the three Federal Transit Administration (FTA) human-services transportation programs, Elderly Individuals and Individuals with Disabilities (Section 5310), Job Access and Reverse Commute (JARC; Section 5316), and New Freedom (Section 5317), must certify that the projects to be funded have been selected in the context of a locally developed, coordinated public transit-human services transportation plan; and that the plan be developed and approved through a process that included participation by seniors, individuals with disabilities, representatives of public, private, and non-profit transportation and human services providers and other members of the public. The structure of programs under MAP-21, however, is different. JARC no longer exists as a separate program, but funding for JARC types of activities is available under FTA's urban and rural formula programs. Another change is that the New Freedom program merges with Elderly Individuals and Individuals with Disabilities. MAP-21 authorized \$254,800,000 for FY 2013 and \$258,300,000 for FY 2014, which is an increase over the SAFETEA-LU authorized amount of \$226,000,000 for FY 2012 for the Section 5310 and Section 5317 programs combined.

In addition to the types of projects eligible under the traditional Section 5310 program and the former New Freedom program, a new eligible activity is public transportation projects that improve access to fixed route service and decrease reliance by individuals with disabilities on complementary paratransit. MAP-21 requires that not less than 55 percent of a recipient's Section 5310 funds be available for capital projects that are "traditional" Section 5310 projects. A recipient may use more of its Section 5310 funds for these capital projects, but may not use less.

The Coordinated Public Transit–Human Services Transportation Plan (CPT-HST) Update needed to reflect MAP-21's provisions and requirements. The CPT-HST Plan documents the Montachusett Metropolitan Planning Organizations (MMPO) region's unmet human-service transportation needs of individuals with disabilities, low-income individuals (or persons below the poverty level) and the elderly. The CPT-HST Plan has been developed by the MMPO as a tool to help local transportation providers and communities improve transportation services, increase efficiency of service delivery, and expand outreach to meet growing needs. It provides a framework to guide the investment of existing transportation resources and the acquisition of future funds.

As such a resource, this plan:

- Evaluates community demographics related to the target populations
- Assesses the transportation gaps and needs of the target populations
- Identifies strategies to address the gaps in transportation services
- Establishes relative priorities of the strategies

A. Enhanced Mobility of Seniors and Individuals with Disabilities Program (Section 5310)

This program provides grant funds for capital and operating expenses to recipients for:

- Public transportation projects planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities when public transportation is insufficient, inappropriate, or unavailable;
- Public transportation projects that exceed the requirements of the Americans with Disabilities Act (ADA) of 1990 (42 U.S.C. 12101 et seq.);
- Public transportation projects that improve access to fixed route service and decrease reliance on complementary paratransit; and

- Alternatives to public transportation projects that assist seniors and individuals with disabilities with transportation.

Under MAP-21 this program no longer provides a single apportionment to each State; it now provides apportionments specifically for large urbanized, small urbanized and rural areas, and will require new designations of designated recipients in large UZAs. Consistent with the type of projects eligible under the former New Freedom program, MAP-21 expanded the eligible activities to include operating expenses.

The goal of the Section 5310 program is to improve mobility for seniors and individuals with disabilities throughout the country, by removing barriers to transportation services and expanding the transportation mobility options available. Toward this goal, FTA provides financial assistance for transportation services planned, designed, and carried out to meet the special transportation needs of seniors and individuals with disabilities in all areas—urbanized, small urban, and rural.

1. *Job Access and Reverse Commute Program (JARC; Section 5316)*

The JARC Program was a formula grant program for projects that improve access to employment-related transportation services for welfare recipients and eligible low-income individuals, and that transport residents of urbanized and rural areas to suburban employment opportunities. MAP-21 repealed the Job Access and Reverse Commute (JARC) programs. However, the JARC program was merged into the Section 5307 Urbanized Area Formula Grant and the Section 5311 Rural Area Formula Grant programs.

2. *New Freedom Program (Section 5317)*

The New Freedom Program was a formula grant program that provided funding for capital and operating expenses that support new public transportation services beyond those required by the ADA and new public transportation alternatives beyond those required by the ADA, designed to assist individuals with disabilities with accessing transportation services. The purpose of the New Freedom formula grant program was to provide additional resources to overcome existing barriers facing Americans with disabilities seeking integration into the work force and full participation in society.

MAP-21 repealed the New Freedom program (49 U.S.C. 5317) and merged the New Freedom program into the Section 5310 program. As a result of this merger of programs, activities eligible under the New Freedom program are now eligible under Section 5310, and, consistent with Section 5317, funds are apportioned among large urbanized areas, small urbanized areas, and rural areas, instead of only to States, as the law previously provided.

3. *Coordination Provisions, Sections 5310, JARC and New Freedom.*

Federal transit law, as amended by SAFETEA-LU, required that projects funded from the Section 5310 program, JARC, and New Freedom programs be derived from a locally developed, coordinated public transit-human service transportation plan (“coordinated plan”). A coordinated plan should maximize the programs’ collective coverage by minimizing duplication of services. A coordinated plan may incorporate activities offered under other programs sponsored by Federal, State, and local agencies to greatly strengthen its impact. FTA also encourages participation in coordinated service delivery as long as the coordinated services will continue to meet the purposes of all programs.

B. New and Revised Programs under MAP-21.

1. *Section 5307 and Section 5311, the Urbanized Area and Rural Area Formula Programs.*

The Section 5307 program makes funds available to designated recipients to assist in the development, improvement and use of public transportation systems in urbanized areas. The Section 5311 program makes Federal funds available to States to assist in the development, improvement, and use of public

transportation systems in rural areas. Under MAP-21, job access and reverse commute projects are eligible under both Section 5307 and 5311. While the overall objectives of the Section 5307, Section 5311 and Section 5310 programs differ (that is, the objectives of Sections 5307 and 5311 are to provide transportation to the general public in urbanized and rural areas and the objective of Section 5310 is to serve seniors and individuals with disabilities in both rural and urbanized areas), there are parallels which make it desirable for designated recipients and States to consider all resources and plan for their use in a complementary way. Local transit providers are expected to participate in the development of a coordinated public transit-human service transportation plan.

2. Demographics of Region

A. Montachusett Regional Planning Commission (MRPC)

The Montachusett region is located in north central Massachusetts and is comprised of 22 communities covering approximately 685 total square miles. The cities of Fitchburg, Gardner and Leominster comprise the major urbanized areas of the region. The remaining communities, with the exception of a few designated small urbanized areas (as defined by the census), are rural in nature. Total population according to the 2010 U.S. Census for the Montachusett Region is 236,475. This is an increase of 8,470 (or 3.71%) from the 2000 U.S. Census population of 228,005.

The region is located in Middlesex and Worcester counties and is bordered by New Hampshire to the north. Located north of the city of Worcester and west of Boston, the region is served by Route 2 and I-190. Of greatest importance to the area is Route 2, running east-west throughout the entire region. This limited access roadway provides the area with a direct link to Boston in the east and to the western half of the state. Consequently, this highway is a major thoroughfare for the state as well as for the region. The region's major urban communities, Fitchburg, Leominster and Gardner, all border Route 2.

In the early 1980's, the completion of I-190 added a second major limited access highway to the region. This roadway provides direct access to Worcester, I-290 and the Massachusetts Turnpike.

B. Montachusett Regional Transit Authority (MART)

The communities served by MART have grown steadily over the years. Initially comprised of Fitchburg, Gardner, Leominster and their immediate neighbors, MART now serves 22 communities in and out of the MRPC region. In 2013, the town of Athol formally became a member of MART thereby increasing the number of in common MRPC/MART communities to 17. Communities outside of the MRPC region include Bolton, Boxborough, Hardwick, Littleton and Stow. Total population of the MART region is 228,778 according to the 2010 U.S. Census. This is an increase of 21,329 (or 10.28%) from the 2000 Census population figure of 207,449. This increase however reflects the addition of one new community, Athol, to MART that alone brought in 11,584 persons. Comparing the same original 21 communities within MART from the 2008 Coordinated Plan, MART witnessed an increase of only 9,745 individuals. This equates to a 4.70% increase.

C. Target Populations

According to federal guidance related to the development of a *Coordinated Public Transit - Human Services Plan*, the target populations for consideration are individuals with disabilities, low-income persons and the elderly. For the purposes of this plan, Census 2010 data was reviewed and analyzed for the target populations and area communities. Definitions related to the identification of the populations discussed are derived from those utilized by the U.S. Census Bureau.

In addition, several population characteristics that were originally collected as part of prior ten year census counts were not part of the 2010 census tabulations. This includes information on disability and poverty levels. These data characteristics have become part of the American Community Survey (ACS). According to the Census Bureau:

“After the 2000 Census, the long form became the ACS and will continue to collect long-form-type information throughout the decade. The ACS includes not only the basic short-form questions, but also detailed questions about population and housing characteristics. It is a nationwide, continuous survey designed to provide communities with reliable and timely demographic, housing, social, and economic data every year. Since its start, the ACS has been providing a continuous stream of updated information for states and local areas...

By focusing on quality geographic coverage, the ACS can produce a good picture of the community's people and housing by surveying a representative sample of the population. The Census Bureau

selects a random sample of addresses to be included in the ACS. Each address has about a 1-in 480 chance of being selected in a month, and no address should be selected more than once every 5 years.

The Census Bureau mails questionnaires to approximately 295,000 addresses a month across the United States. This is a small number of households considering there are more than 180 million addresses in the United States and an address that receives ACS instructions will not likely find a neighbor or friend who has also received them.” (Source: American Community Survey Information Guide – U.S. Census Bureau www.census.gov/acs/www/Downloads/ACS_Information_Guide.pdf)

Because of the use of sample data, various margins of error are also provided as part of the ACS data. These margins can be significant depending on the data obtained. Additionally, some numbers/data may not be listed due to sample sizes and confidentiality requirements.

Because of these data issues, as well as discrepancies in the way the data is broken down, it is difficult to make a one-to-one comparison between the 2000 Census, the 2010 Census and the 5 year ACS Estimates.

1. Target Population - Individuals with Disabilities

According to the Census Bureau website, “The Census Bureau collects data on disability primarily through the American Community Survey (ACS) and the Survey of Income and Program Participation (SIPP). The definitions of disability are not always alike so caution should be taken when making comparisons across surveys. Generally,....the ACS has a more narrow definition (of disability) but is capable of producing estimates for states, counties, and metropolitan areas. Because the ACS has replaced the decennial long-form as the source for small area statistics, there is no disability data in the 2010 Census. (source: <http://www.census.gov/people/disability/>)

American Community Survey (ACS) – History

The ACS was started as a way to provide a “continuous measurement of the U.S. population and to reduce the ... complexity of the decennial census”. The ACS replaces the former Census “long-form” thus allowing “the decennial count to focus on a basic headcount and minimal demographic data”.

After the 2000 Census, the ACS questions on disability were reviewed and revised. New questions were developed and six disability types were identified.

- **Hearing difficulty** - deaf or having serious difficulty hearing (DEAR).
- **Vision difficulty** - blind or having serious difficulty seeing, even when wearing glasses (DEYE).
- **Cognitive difficulty** - Because of a physical, mental, or emotional problem, having difficulty remembering, concentrating, or making decisions (DREM).
- **Ambulatory difficulty** - Having serious difficulty walking or climbing stairs (DPHY).
- **Self-care difficulty** - Having difficulty bathing or dressing (DDRS).
- **Independent living difficulty** - Because of a physical, mental, or emotional problem, having difficulty doing errands alone such as visiting a doctor’s office or shopping (DOUT).

For this report, disability data was obtained from the 2008-2012 ACS 5 Year Estimates. Those responding to the disability questions of the ACS were compiled into the following age groups:

- Those under 18 with a disability.
- Those aged 18 to 64 with a disability.
- Those over age 65 with a disability..

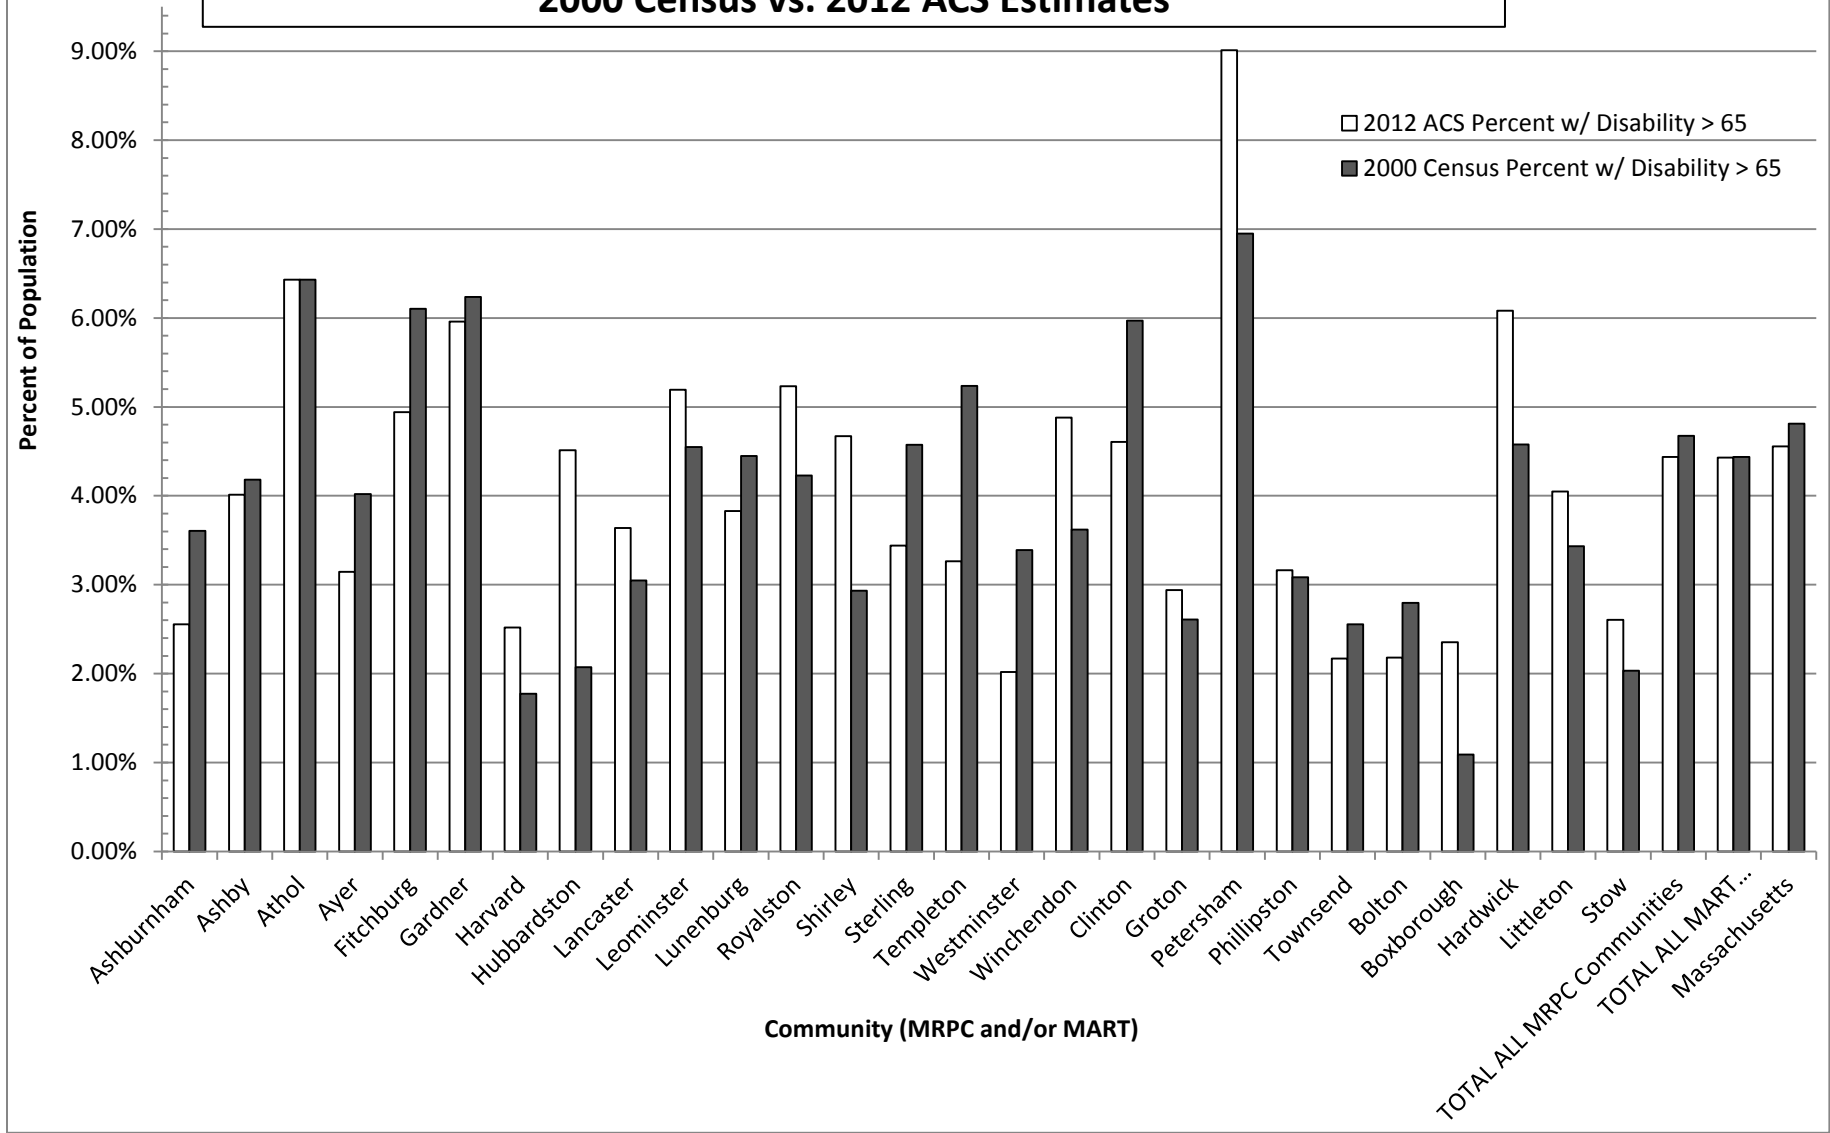

The following table identifies population statistics for persons with disabilities for MRPC and MART communities.

Individuals with Disabilities Population

	2010 Census	2008-2012 ACS 5 Year Estimates							2000 Census		Change in % of Total Population w/Disability Age ≥ 65; ACS vs 2000 Census

Percent Population With A Disability Over 65 Years of Age By Community 2000 Census vs. 2012 ACS Estimates

Within the MRPC region, 12.12% of the total civilian non-institutionalized population is categorized as disabled. In the 2000 Census, the total population over the age of 5 with a disability stood at 18.14%. Limitations with the census versus the ACS disability breakdowns likely account for the discrepancies in the these total population percentages. More than half (13) of the 22 MRPC communities had disability rates of over 10% with the communities of Athol, Gardner and Fitchburg having the highest percentages (18.5%, 16.34% and 14.27%, respectively). Not surprisingly, these are three of the five most populated communities in the MRPC region. Of the five rural communities with total populations less than 5,000 (Royalston, Phillipston, Petersham, Ashby and Hubbardston), the percentage of those classified as disabled range from a high of 13.07% (Petersham) to a low of 9.78% (Ashby). Statewide, the Commonwealth of Massachusetts has an average of 11.21% of the population identified as disabled. The MRPC region therefore is slightly higher than the statewide average, 12.12% to 11.21%.

For the MART region, 12.09% of the population is categorized as disabled also slightly above the statewide average of 11.21%. The MART communities with the highest percentage of disabled population are Athol (18.51%), a recent member of MART, and Gardner (16.34%). Of the MART only communities, the second smallest community in the region, Hardwick, has a disabled population percentage of 14.05%.

2. Target Population - Low-Income Individuals

The definition of “low-income” can vary depending on the agency or program in question as well as by other factors, i.e. region or state. For the purposes of this plan, “low-income” or “poverty” as defined by the Census Bureau was utilized since the census data is the basis for analysis.

The Congressional Research Service Report “Poverty in the United States: 2013 by Thomas Gabe states the following:

“The Census Bureau’s poverty thresholds form the basis for statistical estimates of poverty in the United States. The thresholds reflect crude estimates of the amount of money individuals or families, of various size and composition, need per year to purchase a basket of goods and services deemed as “minimally adequate,” according to the living standards of the early 1960s. The thresholds are updated each year for changes in consumer prices. In 2013, for example, the average poverty threshold for an individual living alone was \$11,888; for a two-person family, \$15,142; and for a family of four, \$23,834.”

From the Census Bureau, the following table was identified that provides 2013 income figures to help determine poverty levels.

Poverty Thresholds for 2013 by Size of Family

Size of Family Unit	Weighted Average Thresholds
One person (unrelated individual).....	\$11,888
Under 65 years.....	\$12,119
65 years and over.....	\$11,173
Two people.....	\$15,142
Householder under 65 years.....	\$15,679
Householder 65 years and over.....	\$14,095
Three people.....	\$18,552
Four people.....	\$23,834
Five people.....	\$28,265
Six people.....	\$31,925
Seven people.....	\$36,384
Eight people.....	\$40,484
Nine people or more.....	\$48,065

Source: U.S. Census

From the Census 2000 Brief “Poverty: 1999”, different poverty level thresholds were established based upon the size of the family unit. The following table provides those thresholds.

Size of Family Unit	
One person	\$8,501
Two people	\$10,869
Three people	\$13,290
Four people	\$17,029
Five people	\$20,127
Six people	\$22,727
Seven people	\$25,912
Eight people	\$28,967
Nine or more people	\$34,417

Source: Poverty: 1999, Census 2000 Brief, May 2003, U.S. Census Bureau

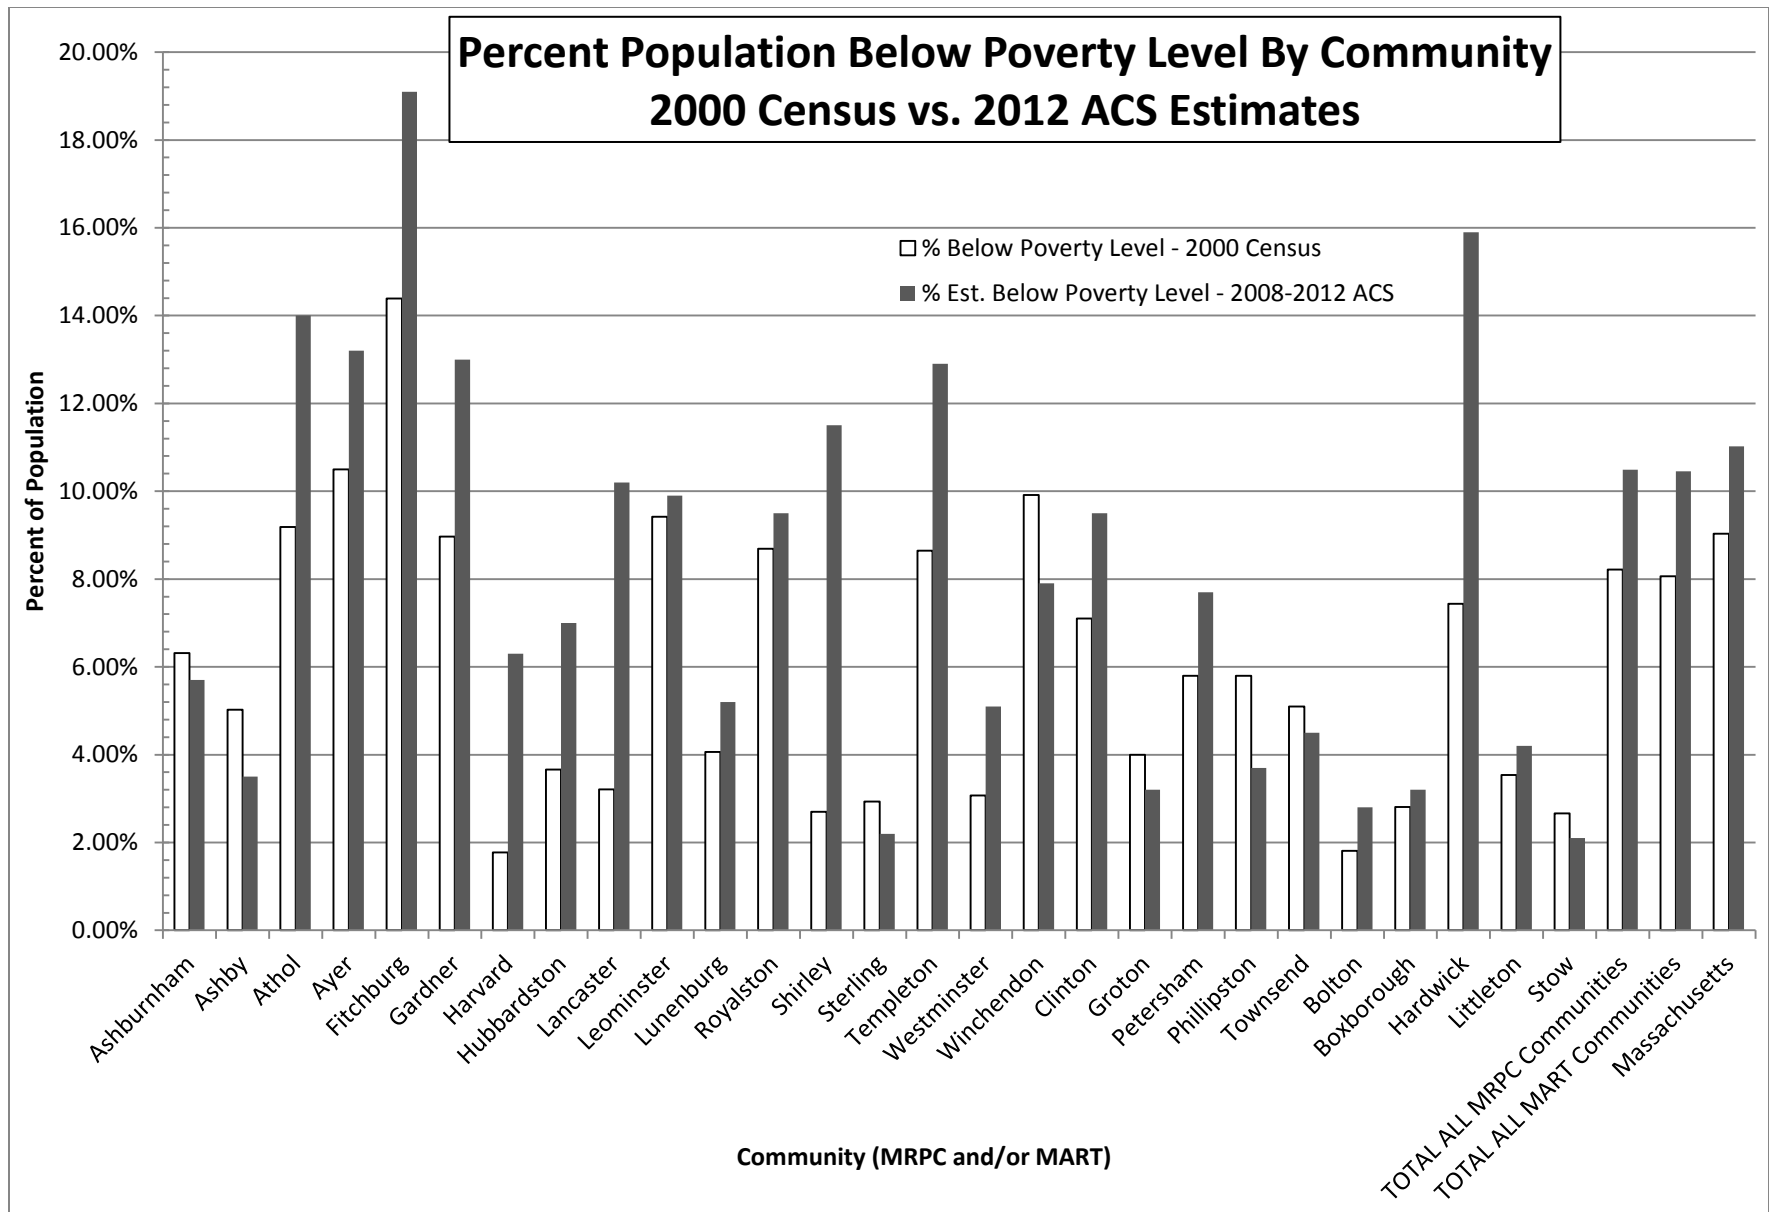

Because of the different methods and time frames utilized to collect data for the decennial census and the ACS, comparisons “may differ from those reported in the Current Population Survey, Annual Social and Economic Supplement and those in Census 2000.”

The following table identifies population statistics for low-income or poverty level individuals for MRPC and MART communities.

Low Income Individuals Population

Unemployment in the Region

Unemployment rates in the MRPC/MART communities have reflected the trends seen statewide over the years from 2008 to 2013. The lack of employment is an obvious factor to those living at or below the poverty level. An additional contributor to this has been the decline of manufacturing jobs in the region which often provide an entry into the workforce for many low income individuals. The region once enjoyed the highest concentration of manufacturing jobs in the Commonwealth, but this sector has been experiencing a decline for decades consistent with state and national trends.

MRPC/MART Communities	Unemployment Rates

Source: Labor Market Information: Executive Office of Labor & Workforce Development website

Statewide the average percent of the population below the poverty level is 11.03% (source: ACS 2008-2012) which is an increase of 2% from Census 2000 levels (9.03%). Within the MRPC and MART regions, ACS data shows an average that falls just below the statewide average at 10.49% and 10.45%, respectively. When placed next to the Census 2000 figures, both regions also saw a change of just over 2%.

Within the MRPC region, six communities have a population percentage below the poverty level that exceeds the statewide average: Athol, Ayer, Fitchburg, Gardner, Shirley and Templeton. Of these, Fitchburg has the highest percentage at 19.10%. The remaining 16 of the 22 MRPC communities (or 72.3%) have a population percentage below the poverty level that is below the statewide and region averages of 11.03% and 10.49%, respectively. Not surprisingly, the more urban and densely populated communities have a higher percentage of individuals below the poverty level.

For those communities in the MART region, seven municipalities have a population percentage below the poverty level that exceeds the statewide average: Athol, Ayer, Fitchburg, Gardner, Shirley, Templeton and Hardwick. Fitchburg, as in the MRPC region, has the highest level at 19.10%. The remaining 15 communities within MART (or 68.2%) have a population percentage of individuals below the poverty level that is less than the MART region's average of 10.49% and the statewide average of 11.03%. .

3. Target Population – Elderly Individuals

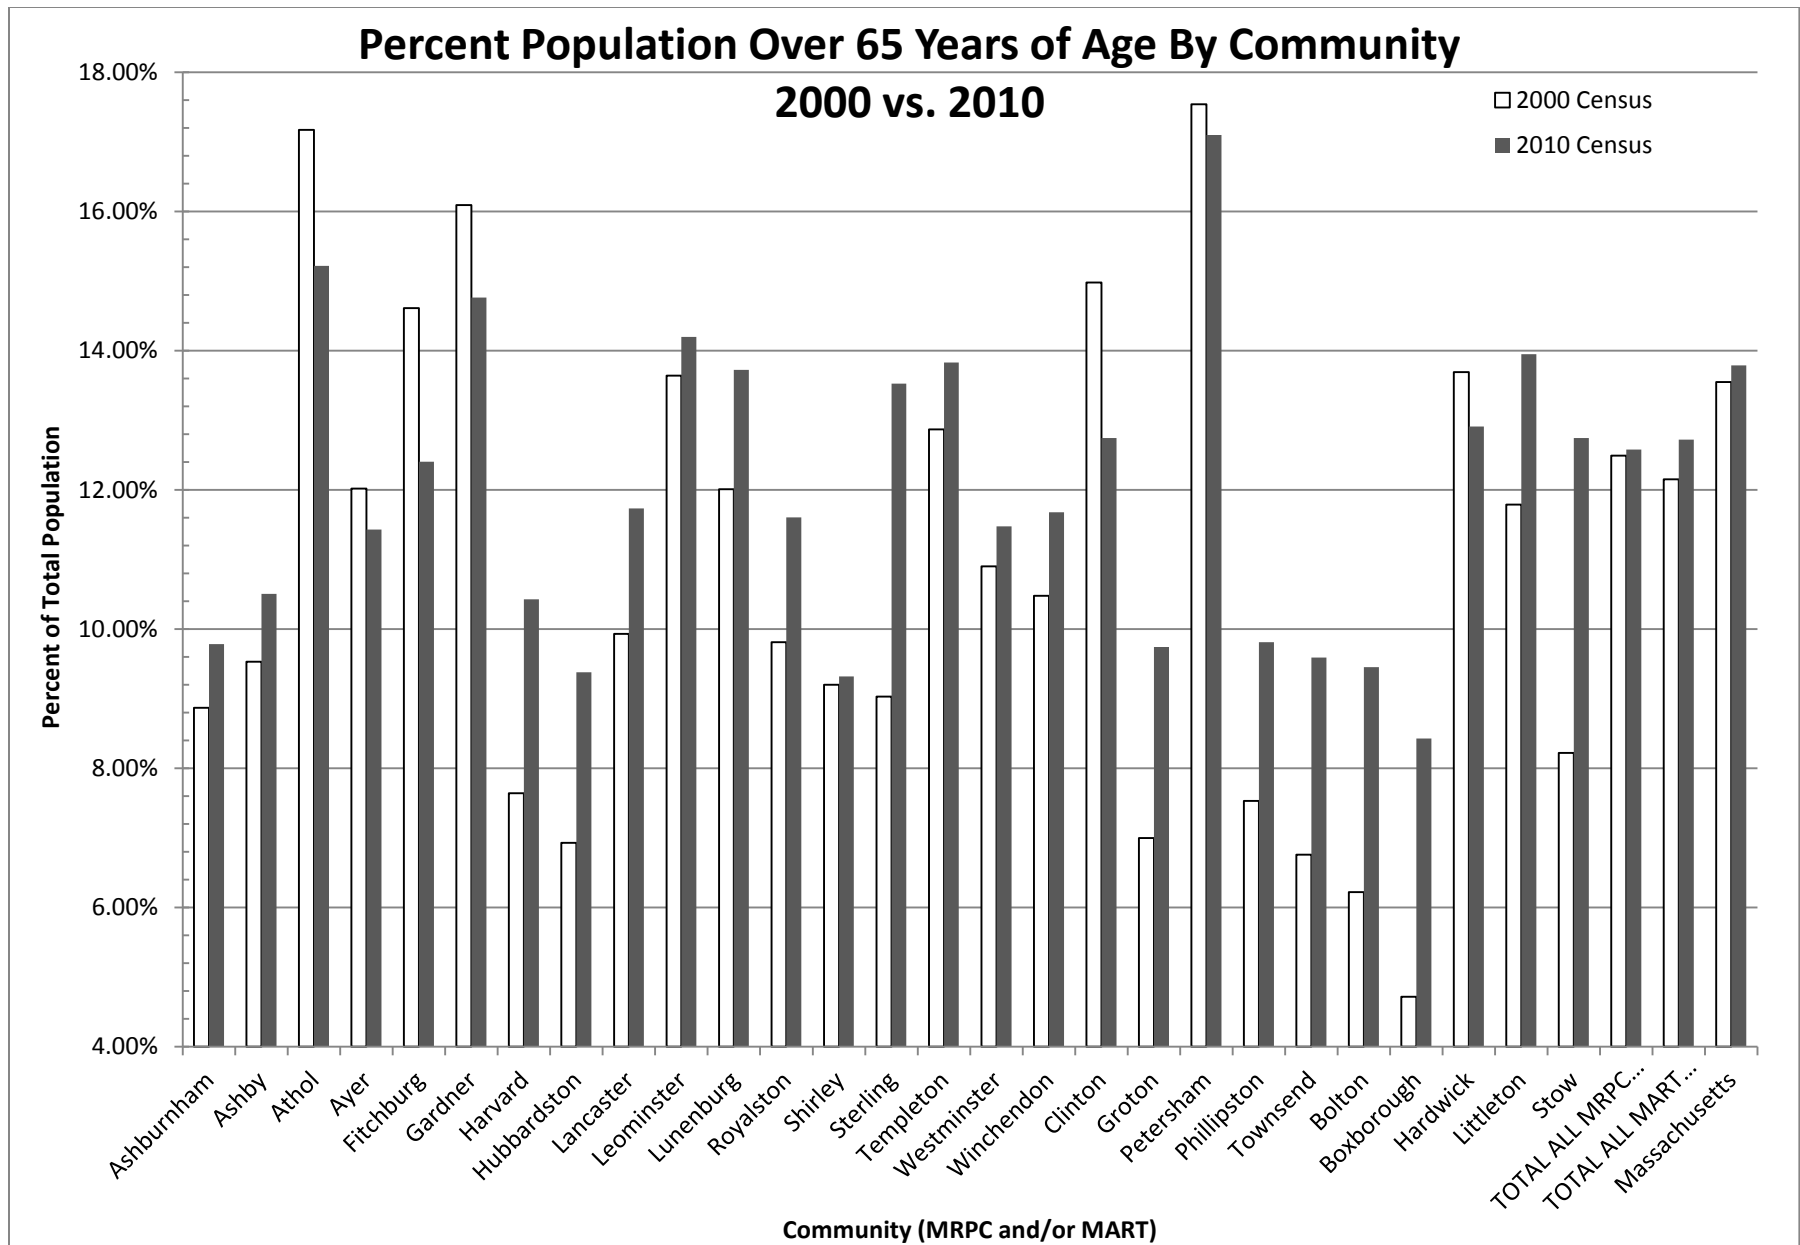

Elderly individuals are identified as those persons aged 65 or older. The 2010 Census collected age demographics as part of its regular questionnaire. As such, a direct comparison to prior decennial census data is possible as the need to utilize ACS estimates is not required.

The following table identifies elderly population statistics for MRPC and MART communities for the 2000 Census and the 2010 Census. Breakdowns related to male/female are also provided as well as a calculation on the percent change to the population for those identified as elderly between the two census data sets.

Elderly Individuals Population

Massachusetts	6,547,629	367,087	5,277,818	376,425	526,299	902,724	13.79%	Massachusetts	13.55%	13.79%	0.24%

Within both the MRPC and the MART regions, the percentage of elderly individuals has remained relatively unchanged between 2000 and 2010. In the MRPC communities, 12.58% of the population in 2010 is over age 65 an increase of only 0.09% from 2000. MART communities also saw a smaller increase in the elderly population from 2000 to 2010 of only 0.57%. Statewide, the Commonwealth of Massachusetts had an increase in the elderly population from 12.15% in 2000 to 12.72% in 2010, a change of only 0.24%. Compared to the statewide figures, both the MRPC and MART regions were below the state average in both 2000 and 2010 by at least one percentage point, i.e. in 2010 MRPC and MART were at 12.58% and 12.72%, respectively compared to the statewide average of 13.79%.

For the MRPC region according to the 2010 Census, five communities have a higher percentage of elderly population than the state average of 13.79%. With the exception of the town of Templeton and Petersham, which had the highest percentage of elderly in the MRPC region, 17.10%, the larger and usually more urban municipalities of Athol, Gardner and Leominster have the greatest percentage of elderly individuals.

In the MART region, only five communities exceed the 2010 Census state average of 13.79%. Two of the municipalities, Gardner and Leominster, are among the top three largest communities in the MART region. The remaining three, Athol, Templeton and Littleton, have areas of denser populations. The highest percentage of elderly exists in the community of Athol at 15.22%.

D. Title VI and the Coordinated Plan

The Montachusett Metropolitan Planning Organization (MMPO) is committed to assisting individuals, for whom English is not their primary language, understand and have access to MPO programs, activities or services. Language for many Limited English Proficiency (LEP) individuals can be a barrier to accessing important benefits or services, understanding and exercising important rights, complying with applicable responsibilities or understanding other information provided by federally funded programs and activities. This can also be a barrier to accessing transit options especially if a LEP individual is also a member of one or more of the Coordinated Plan's target populations.

In response to Title VI concerns related to language issues, the Montachusett MPO has developed a Limited English Proficiency (LEP) Plan to identify reasonable steps to provide language assistance for LEP persons who seek meaningful access to MPO programs as required by Executive Order 13166. A Limited English Proficiency person is one who does not speak English as the primary language and who has a limited ability to read, speak, or write, or understand English. Please refer to the Montachusett *Limited English Proficiency (LEP) Access Plan* endorsed by the MPO in February 2013 for a more complete discussion and presentation on LEP.

1. LEP Persons in the Montachusett Region

The following is from the 2014 Montachusett MPO Title VI Annual Report:

The MPO examined the 2010 Census and was able to determine that approximately 5% (or 11,054 people) of the MRPC population age five and older speak English less than very well, not well or not at all. The majority of those individuals reside in Leominster and Fitchburg (respectively). The communities of Shirley and Harvard also have a high LEP population which is likely impacted by the closing and reuse of the Fort Devens military facility. The first table below highlights the percentage of each communities' population aged 5 and over that are identified as speaking English less than very well (ELTVW). The second table provides information on the various languages of those identified as speaking ELTVW. The languages selected for identification in the second table represent ELTVW populations of 3.00% or greater residing within the region.

Population Age 5+ Who Speak English Less Than Very Well

Community	Total Pop. Age 5+	Speaks English Less Than Very Well	% Speaks English Less Than Very Well
Ashburnham	5,781	35	0.61%

2. LEP Populations

Language accessibility as an issue was highlighted in some of the responses to passenger surveys conducted for the MART fixed route system. In addition to English, surveys were conducted in Spanish with a language assistant available to those in need. Although the response rate was small, the comments received regarding any system issues did contain several references to the need for improved translation services, schedules and training. Please refer to the following section for more detailed information regarding survey results.

E. Facilities

The goal of any transit service is to provide service to any number of attractions or destinations that will serve the target audience. For the target populations of the Coordinated Plan, several types of facilities were identified as potential attractions. These facilities were collected through various sources by the MRPC and are categorized by their function and location.

1. Senior Facilities

Facilities categorized as Senior and Elderly are assumed to serve the elderly population. They include assisted living centers, elderly housing complexes and centers, and nursing and rest homes. See appendix for a detailed list of facilities.

For the MART and MRPC regions, the following table summarizes the identified senior facilities.

Senior Facilities

Community	Type of Facility	Number of Facilities	Is Facility Within 0.25 miles of Transit Service?	Is Facility Within 0.50 miles of Transit Service?
Ashburnham	Elderly Housing	1	N	N
Athol	Assisted Living	2	Y (1)	Y (1)

	TOTAL	86	44	57

Source: Executive Office of Elder Affairs & MRPC, 2014

Of the 86 elderly facilities identified in the MART and MRPC regions, 44 or over half (51%) are located within 0.25 miles of an existing transit service, i.e. a fixed route, or commuter rail line. It is assumed users of existing transit services regardless of age or target group within a quarter mile of service have adequate access to the system. If this access assumption is expanded an additional quarter mile, then an additional 13 elder facilities, or 66% of all identified facilities, are within 0.5 miles of existing transit service in the region.

2. Medical Facilities

Medical facilities are important destinations for all members of the population, but to those who depend upon transit services there accessibility is extremely important. Facilities within this category include hospitals, medical offices, community health centers, clinics, and medical centers. See appendix for a detailed list of facilities.

The following table summarizes the medical facilities within the MART and MRPC regions. Some facilities or locations contain multiple medical offices, i.e. professional medical buildings. These locations are listed once but with a note that they contain multiple offices. They are counted as only one facility.

Medical Facilities

Community	Facility Name	Facility Type	Multiple Offices	Facility Within 0.25 miles of Transit Service?	Facility Within 0.5 miles of Transit Service?

Source: MA DPH & MRPC, 2014

From the identified facilities, 4 of the 6 area hospitals (or 67%) are within a quarter mile of existing transit services. These include Athol Memorial Hospital, Health Alliance Hospital – Burbank Campus in Fitchburg, Heywood Hospital in Gardner and Health Alliance Hospital – Leominster Campus. The two facilities not included in this group are located in Ayer and Clinton: the Nashoba Valley Medical Center and Clinton Hospital, respectively.

Of the other identified medical centers, i.e. offices and clinics, over 60% are either within 0.25 or 0.5 miles of current transit services in 15 of the MART and MRPC communities. As can be expected, the larger urban municipalities with fixed route service, Athol, Fitchburg, Gardner and Leominster, have all of their identified medical facilities within the quarter and half mile buffers around the transit services.

3. Early Education and Childcare Facilities

Important to individuals who utilize public transit services is the ability to access places of employment as well as those facilities that provide services for their families. Early education and childcare facilities provide the supervised child support needed to allow individuals to seek out and maintain employment. For this review, early education and childcare facilities were limited to those that provide services to 6 or more children. Data collection of these types of facilities provided sub-categories of daycare centers.

The facilities were identified as Family Child Care, Group Child Care and School Age Child Care. These sub-categories are not used for this analysis. All facilities are simply identified as Early Education and Childcare Facilities without distinctions related to the type and age group of supported by the facility.

The following table summarizes the early education and childcare facilities within the MART and MRPC regions.

Early Education & Childcare Facilities (6 >) within Walking Distance to Transit Services

Community	No. Facilities	Is Facility Within 0.25 miles of Transit Service?	Is Facility Within 0.5 miles of Transit Service?
Ashburnham	7	N	N

Winchendon	17	Y (7)	Y (9)
Totals	345	127 36.81%	164 47.54%

Source: MA DOE, 2014

Three hundred and forty five early education and childcare facilities were identified. Of those, 37% of the region's facilities are within 0.25 miles of current transit services. This number jumps to 48% when that buffer is extended to 0.5 miles. When examining the cities of Fitchburg, Gardner and Leominster, the percentages under both scenarios exceeds the region averages, as does Athol, Phillipston, Shirley,

Templeton and Winchendon. In the case of Fitchburg and Gardner, the percentages exceed 60% of the facilities within either 0.25 or 0.5 miles of transit services.

4. Major Employers and Industrial Park Facilities

For the review of employment facilities, locations were limited to those classified as major employers, i.e. with 250 or more employees, or to industrial parks. These sites were deemed to be significant attractions that could support or need transit service. The following table summarizes the major employers and industrial park facilities within the MART and MRPC regions.

Major Employers (100+) within Walking Distance to Transit Services

Community	Type of Facility	No. Facilities	Is Facility Within 0.25 miles of Transit Service?	Is Facility Within 0.5 miles of Transit Service?
Ashburnham	Major Employer	1	N	N

Region Totals	Industrial Area	3	0	0
	Industrial Park	15	6	11
	Major Employer	171	76	87
		189	82	96

One hundred and eighty nine facilities were identified within the MART and MRPC regions. Region wide over 43% of the facilities were within 0.25 mile buffer established. This number increased to 51% when the buffer was increased to 0.5 miles. Again, in the urban cities of Fitchburg, Gardner and Leominster, most of the facilities fell within 0.5 miles of existing transit services.

3. Transit Services

The following information provides an overview of the existing transit services in the MRPC region. The majority of the services are run by or administered by the Montachusett Regional Transit Authority. Services range from fixed route bus systems in the major urban communities, to on demand paratransit service and to commuter rail train service to Boston.

A. *Montachusett Regional Transit Authority (MART) Overview*

The Montachusett Regional Transit Authority (MART) provides a variety of transportation services for residents of the Montachusett Region and other areas throughout the Commonwealth. Twenty-two (22) communities in the Commonwealth use MART services. Fixed route bus services, paratransit and subscription services are operated chiefly by Management of Transportation Services, Inc, a private management company. All other transportation is operated by a variety of private vendors in Massachusetts. The Massachusetts Bay Transportation Authority (MBTA) is responsible for commuter rail services from Fitchburg to Boston.

B. *Fixed Route*

1. Fitchburg/Leominster and Gardner

The local transit bus service is the most prominent method of public transportation in the region. Local fixed route bus services operate along set routes and follows set a schedule. Local bus services are available in the three cities: Fitchburg, Leominster and Gardner. Sixteen (16) bus routes are provided by MART, eleven (11) in Fitchburg and Leominster, four (4) in Gardner and one (1) intercity route between the three cities. Service operates Monday through Saturday. Bus services are not offered on Sundays and most holidays. The cost for adults to ride the fixed route service is \$1.00. For the elderly and disabled (with proper identification), the cost is \$0.50. Children under the age of five ride for free with an accompanying adult. Local bus transfers are free with paid fare and are valid for two (2) hours. Pass products are available.

Fixed route bus service in Fitchburg and Leominster is available every 20 – 60 minutes, depending on the route. In the City of Gardner bus service is available every 60 minutes.

Fixed Routes	Fixed Routes Yearly Ridership				Percent Change 2011 to 2014
	Fiscal Year				
	2011	2012	2013	2014	
Leominster/Fitchburg	465,527	524,541	581,331	594,342	21.67%
Gardner	59,015	64,132	55,052	59,435	0.71%

Source: Montachusett Regional Transit Authority

The above yearly ridership figures show a continued growth from 2011 to 2014 with an overall 21.67% increase over the four years in Fitchburg and Leominster. Annual ridership figures for Gardner show a much more gentle increase over the same four year period. After a decline from 2012 to 2013, 2014 ridership is now back to 2011 levels.

2. G-Link Service

Bus service is also available along the Route 2-2A between Greenfield and Gardner, with stops in the towns of Athol, Orange, Gardner, Phillipston, Templeton, and Winchendon. Six separate routes make up this service. Times vary on routes with service starting at 5:15 a.m. and ending at 7:00 p.m. on weekdays only. The Montachusett Regional Transit Authority (MART) and the Franklin Regional Transit Authority

(FRTA) operate the G-Link service. Free transfers between MART and FRTA buses are available at the Hannaford Market in Orange.

G-Link Yearly Ridership					
Fiscal Year					
G-Link Route	2011	2012	2013	2014	Percent Change 2011 to 2014
Athol/Orange Link	16,297	18,655	24,059	29,559	44.87%
Winchendon Link	4,949	4,992	5,484	5,916	16.35%

Source: Montachusett Regional Transit Authority

Over the same four period of 2011 to 2014, ridership has continued to grow consistently along the G-Link routes.

3. Intercity Bus Service

Intercity bus service is provided by MART from Fitchburg and Leominster to Gardner. Main stops in Gardner are Mount Wachusett Community College and the City Hall. This service operates at peak times from 6:15 a.m. to 7:30 p.m. and is on weekdays only.

Peter Pan Transit Line also provides bus services that stop at the Getty Station 528 North Main Street in Leominster. Peter Pan has a bus that leaves daily from the Getty Station traveling from Leominster to Worcester with connections to Hartford, CT, to New York City or to Foxwoods Casino. The bus leaves Leominster 7:35 a.m. arrival time for New York City is 2:00 p.m. and 9:30 a.m. for Foxwoods Casino. Return trips from New York City leave at 1:30 p.m. and arrive at Leominster at 6:15 p.m. Return trips from Foxwoods Casino depart at 4:30 p.m. and arrive in Leominster at 6:15 p.m.

C. Para Transit Services

Paratransit service includes curb-to-curb transportation for citizens with disabilities who are eligible under the criteria of the Americans with Disabilities Act (ADA). Service is demand-responsive and available in conjunction with fixed route bus service in Fitchburg, Leominster, Gardner and parts of Lunenburg and Lancaster. Paratransit services are available Monday to Friday from 5:00 a.m. to 7:00 p.m and 9:00 a.m. to 5:45 p.m. on Saturday. The service is not offered on Sundays or on holidays. Cost to the disabled is \$1.50 for rides within Fitchburg/Leominster or within Gardner. A \$3.00 fare is charged between the Gardner area and Fitchburg/Leominster area. In other communities in the region, twenty-two (22) member Councils on Aging provide service for their senior and disabled. Prices and times of operation vary per community with an average fare of eighty cents (\$0.80) for one way in town trips and \$2.50 for one way out of town trips.

Communities	Paratransit Yearly Ridership				Percent Change 2011 to 2014
	Fiscal Year				
	2011	2012	2013	2014	
Leominster/Fitchburg	40,106	43,483	44,471	49,766	19.41%
Gardner	10,028	8,094	7,272	8,629	-16.21%

Source: Montachusett Regional Transit Authority

D. Subscription Service

Subscription service allows for transportation to work and school within a fixed schedule, with fare payment made on a regular, monthly basis. Service is available in Fitchburg, Leominster and surrounding

communities, and service is curb-to-curb. Cost of the service starts at \$80.00 per month and depends on the pick-up and drop-off destination. In the Fitchburg and Leominster region, 205 average daily trips are provided by MART (2015).

E. Job Access Reverse Commute (JARC)

Evening transportation is provided in Fitchburg, Leominster and Gardner to industrial, retail and medical facilities. The service is offered Monday through Saturday; there is no JARC service available on Sunday. The service is designed primarily for employment purposes. The cost of JARC is \$1.25. Users need to call MART 24 hours in advance to utilize this service. The hours of service in the Fitchburg/Leominster area is Monday-Saturday from 10:00 p.m. to 11:30 p.m. The service hours for Gardner are the same Monday through Saturday.

F. Boston and Worcester Shuttles

MART provides transportation to veterans, the elderly, disabled citizens as well as the general public to medical facilities in Worcester and Boston. The one way fare to Worcester is \$10.00, and to Boston is \$12.00. Through an agreement between MART and the cities of Fitchburg and Leominster, veterans from these communities ride at no charge to the individuals. There are an average 26 riders per day on these shuttles. There are three shuttles to each city on weekdays.

G. Dial-A-Mart Van Service

Transportation is available to various social service agencies for their clients. Service is provided Monday through Friday from 5:00 a.m. - 7:00 p.m., and on a negotiated cost basis with the agencies.

H. Greater Athol/Orange Area Dial-A-Ride Services

MART provides demand response services to low-income, disabled and seniors residents in Athol/Orange region for transportation to employment, medical appointments, educational facilities, life needs shopping, etc. The operation also provides feeder services to MART fixed route Link services to Gardner and Winchendon as well as connections to the FRTA fixed route services to Greenfield.

The transportation operations are covered through:

- Legislative subsidy
- Rider fares

Continuation of this service is an ongoing goal of the RTA. MART continues to work with the state legislative delegation to identify funding for this service.

I. Self Funded Services

MART coordinates transportation for Massachusetts' human service agencies, namely, the Department of Developmental Services (DDS), Mass Health, and the Department of Public Health (DPH). Private transportation operators provide these services. Travel is funded by the State agencies.

MART also coordinates special education transportation for local school districts. Special Education departments fund this transportation.

1. Department of Developmental Services (DDS)

MART provides transportation broker services for the Department of Developmental Services (DDS) for the Pioneer Valley area, and the Central/West regions which includes the North and South Central areas, and the Metro Boston region including the North and South Shore areas. In the Pioneer Valley region, MART utilizes eight transportation providers to transport approximately 875 clients daily to 15 day programs. In the North and South Central regions, MART utilizes 25 transportation providers to transport

approximately 1,740 clients to 31 day programs. For the Northeast Region, 30 transportation providers transport approximately 2,100 clients to 31 day programs and in the Southeast Region, 10 providers transport approximately 560 clients to 15 day programs. In the Metro Region, MART makes use of 25 providers to transport approximately 1,810 clients to 50 day programs. Approximately 7,085 individuals are transported daily to 142 programs across the state through 98 private vendors subcontracted to MART.

2. Mass Health Transportation Program

MART provides brokerage services for MassHealth consumers for the Greater Metro Boston Area, which includes Woburn and Cambridge/Somerville, the Pioneer Valley Area, the North Central, which includes Fitchburg and Lowell, and the South Central Area which includes Worcester. MART has contracts with 176 transportation providers that accommodate approximately 7,750 one-way trips per day within two hundred and twenty-three (223) cities and towns, with the highest volume in the Metro Boston area.

3. Department of Mental Health (DMH)

MART currently provides DMH services for five (5) regions across the state and utilizes 16 transportation providers to transport approximately 460 clients to 14 DMH clubhouses.

4. Department of Public Health (DPH) Early Intervention (EIP) Program

MART manages EIP transportation within four regions, Pioneer Valley, North and South Central and Greater Boston. Service is accomplished through a quoting process that brokers services with 18 private transportation providers that transport approximately 1,298 children from birth to age three to 83 active Early Intervention Programs averaging approximately 6,650 trips per month. In previous years, MART has achieved a reduction in the overall cost of these services of 15 percent. MART continues to develop the most efficient and cost effective system possible.

5. Massachusetts Rehabilitation Commission (MRC)

MART provides transportation services to MRC consumers through a primarily demand response service with the majority of transportation for individuals going to meetings, conferences and job sites.

6. Mass Commission for the Blind (MCB)

MART also provides transportation services to MCB consumers through a primarily demand response service for medical appointments.

7. Integrated Care Options (ICO)

MART provides transportation services for the Integrated Care Options (ICO) program. This service is for dual enrolled Medicaid recipients where the member is able to change their insurance coverage from MassHealth to an ICO insurance company, currently three companies, Fallon Total Care, Commonwealth Care Alliance and Network Health.

8. Special Needs Transportation (SPED)

MART provides management and brokerage services for Special Education and McKinney-Vento Transportation to five Special Education Departments: Ashburnham-Westminster Regional School District (in and Out-of-District and McKinney-Vento), Ayer-Shirley Regional School District (Out-of-District and McKinney-Vento), Fitchburg Public School (Out-of-District and McKinney-Vento), Leominster Public Schools (Out-of-District and McKinney-Vento), and Worcester Public Schools (Out-of-District and McKinney-Vento).

Service is accomplished through quoting and brokerage process with eight private transportation operators using a low bid system while promoting cost-shared routes whenever possible.

MART provided in FY2015 Summer transportation to 226 Special Education students to various In and Out-of-District schools with a summer budget of \$228,585. MART is currently providing FY2015 Fall transportation for 204 students with an estimated budget of \$1,824,992.

J. Commuter Rail

Commuter rail service is managed by the Massachusetts Bay Transportation Authority (MBTA). The service operates from Fitchburg to Boston. The trains stop in the following Montachusett communities: Fitchburg, Leominster, Shirley, Ayer and Littleton. The Montachusett Regional Transit Authority (MART) provides a transit service from Gardner to Fitchburg designed for commuters that wish to travel to Boston by train, as there is no service available from Gardner. A one-way fare from Fitchburg to Boston is \$10.50.

Thirteen (13) trips leaving from Fitchburg to Boston and Thirteen (13) trips from Boston back to Fitchburg are provided by the MBTA on weekdays. Inbound service starts at 5:15 a.m. and ends at 10:30 p.m. Outbound service starts at 8:55 a.m. and finishes with its last trip at 12:10 p.m. Saturday and Sunday service there are six (6) inbound trips to Boston and six (6) outbound trips to Fitchburg. On August 4, 2014, MBTA Instated new train service trips to and from Littleton Station for a total of seventeen (17) inbound trips to Boston and seventeen (17) outbound trips to Littleton with first outbound train arrival at 8:37am. The one-way fare from Littleton to Boston is \$9.75.

The Fitchburg Line transports an estimated 6,000 one-way passengers per day, approximately double the amount of riders ten years ago.

K. Transit Recommendations and Needs

In order to provide increased mobility for Montachusett area residents that do not own automobiles or that choose to be less dependent on a personal vehicle, MART will need to continue to refine and implement appropriate and innovative public transit programs designed to increase ridership. It will be necessary to examine the routes and schedules to determine the most efficient and effective service. MART is open to expanding services wherever possible to fill service gaps, meet unmet regional needs and increase accessibility to health facilities and social services. Where it becomes apparent that certain services are needed, for example evening transportation to local colleges (Mount Wachusett Community College, Fitchburg State University, etc.), MART should continue to work with those institutions to examine requests, organizational involvement and ways to help defray the cost of the additional services. Continued participation of local industries, businesses, major shopping centers and schools in developing appropriate schedules, routes and promotional programs is an important part of this ongoing planning and implementation of services.

Special service provided to the elderly and the disabled will need to be monitored to insure continuation of appropriate levels of service in light of MART's complementary ADA plan. Continue brokerage programs with the Department of Public Health, Department of Developmental Services, MassHealth, Department of Mental Health, MRC, MCB and special education departments of local school systems.

In addition to increased and improved routing and scheduling, it will be necessary for MART to maintain and improve the operating condition of its vehicle fleet. Expansion of MART maintenance/storage facility at Water Street in Fitchburg was completed in March, 2001. This facility includes four additional service bays and additional administrative space. In 2011, MART completed the storage facility expansion for 100 buses and vans with a bus wash at 840 Main Street in Leominster. The present vehicle fleet is constantly being replaced with new lift equipped ADA compliant equipment. The Montachusett TIP process should continue to be utilized to upgrade and replace buses and vans for the MART fleet.

In order to maintain quality levels of service, a fare increase was initiated in FY 2006/2007. MART had not increased fares in ten years due to the escalating demand and the freeze on Commonwealth funding. This fare increase is an important part of the overall financing of MART. MART is considering a fare increase in calendar year 2015.

Most of the above actions are designed to improve efficiency and lower overall demand on the highway system at a relatively low cost. In summary, there are several key and identifiable avenues by which the MART system can be both properly maintained and improved. They are:

- Continued monitoring of routes and schedules so that any beneficial changes can be identified and implemented;
- Alternative sources of funding for continued transit operations must be developed and instituted;
- The marketing effort must be upgraded and increased to inform the public of transit availability and efficiency;
- Additional equipment such as radios, lift equipped trolleys, lift equipped buses, lift equipped vans, etc., should be acquired;
- Driver safety, CPR, first aid, and sensitivity courses should be maintained;
- Transit services for the elderly and disabled should continue to be upgraded as necessary to insure both availability and accessibility in compliance with MART's ADA complementary paratransit plan;
- Paratransit services provided by MART to social service agency clients should continue to be monitored for coordination of effort;
- Brokerage programs with Department of Public Health, MassHealth, Department of Mental Health, MRC, MCB, Department of Developmental Services, and local schools should be monitored for greater coordination and continued use of private enterprises.

L. Commuter Rail Recommendations and Needs

Within the RTP, several future improvements were identified for the commuter rail system. These included several capital improvements to the line. The following are recommendations limited to operations and that likely effect the identified target populations.

- Increase available parking at the Shirley, Ayer and Littleton commuter rail stations.
- Extend train service to Gardner.
- Improve Handicapped accessibility at Shirley and Ayer Train Stations.
- Train service from Boston to Fitchburg between 1:15 p.m. and 4:30 p.m.
- Reverse commute train from Boston arriving in Fitchburg by 8:00 a.m.
- MAP Purchases for Elderly and Disabled Services (Section 5310).
- Operating Assistance for JARC (Section 5316) type of activities now under FTA's Urban & Rural formula program.
- New Freedoms Services (Section 5317) type of activities now merges with Elderly Individuals and Individuals with Disabilities.
- Explore possibility of a regional commuter rail facility in the Devens Enterprise Zone.

4. Target Populations vs Transit Services

As part of the review of this Coordinated Plan, an analysis was conducted of the identified target populations, as well as the minority population, versus the current existing transit services. The methodology for this analysis is as follows:

1. Census tract information for the communities was established.
2. Existing fixed route and commuter rail transit services were mapped according to current information.
3. A 0.25 and 0.5 mile buffer was established around the current fixed route and commuter rail transit services. Paratransit service is not part of this analysis due to a lack of regular established and identifiable routing.
4. An analysis of where the 0.25 and 0.5 mile buffers and the census tract intersected was compiled. The amount of area within the two buffer zones was calculated and compared to the entire area of the census tract. This produced a percentage of the census tract area covered by the buffer (coverage percentage). Example: Census Tract 1A has an overall area of 10,000 square meters. The 0.25 mile buffer encompasses 2,500 square meters of Census Tract 1A while the 0.5 mile buffer encompasses 3,450 square meters of Census Tract 1A. Therefore, the 0.25 mile buffer covers 25.0% (2,500 square meters/10,000 square meters) of Census Tract 1A. For the 0.5 mile buffer, 34.5% (3,450 square meters/10,000 square meters) of Census Tract 1A would be covered. These coverage percentages were then summed for the entire community resulting in a community coverage percentage.
5. Exact address locations of the target populations within the individual block groups is not available. Therefore, it is assumed that the population is evenly distributed throughout the Census Tract area. The community coverage percentages related to the two buffer zones was therefore used to estimate the amount of the target population in the community that was encompassed by the 0.25 and 0.5 mile buffers. Example: For the community that contains Census Tract 1A from the example above, the elderly population is 15,750 individuals. The community coverage percentage was calculated at 25.0% for the 0.25 mile buffer and 34.5% for the 0.5 mile buffer. Thus, the portion of the community's elderly population estimated to be within 0.25 miles of the existing transit services is 3,938 (15,750 elderly individuals X 25.0% community coverage percentage) and the amount estimated within 0.5 miles is 5,434 (15,750 elderly individuals X 34.5% community coverage percentage).

This methodology was used to estimate the percentage of the target populations that could possibly be serviced by the existing transit services. Please note that this method is used to present a general overview and picture of current services and should be used for planning purposes only. Limitations in the available data prevent any type of precise calculation.

A. Individuals with Disabilities - Target Populations vs Transit Services

The following table lists the MRPC communities and the estimated target population of individuals with disabilities that are within the 0.25 and 0.5 mile buffers established around existing transit services.

Population With a Disability by Community					
Community	Tract ID	Total Population With a Disability	% of Total Population w/ Disability	Estimated Population with a Disability within 0.25 Mile Buffer	Estimated Population with a Disability within 0.5 Mile Buffer
Ashburnham	Census Tract 7001	638	10.52%	0	0
Ashby	Census Tract 3001	300	9.78%	0	0

% of Region Total				29.05%	40.10%

Source: U.S. Census Bureau, American Community Survey 5-Year Estimate 2008-2012

Not surprisingly, the communities with the highest amount of estimate coverage within the buffers are those with existing fixed route services, i.e. Fitchburg, Gardner, Leominster and Athol (G-Link). Overall, for both the MRPC and MART communities, it is estimated that approximately 29 to 40 percent of the disabled population are within 0.25 to 0.50 miles, respectively, of some form of fixed route service.

B. Low Income Individuals - Target Populations vs Transit Services

The following table lists the MRPC communities and the estimated target population of individuals below the poverty level that are within the 0.25 and 0.5 mile buffers established around existing transit services.

Population Below Poverty Level by Community				
Community	Individuals Below Poverty Level	% of Total Population Below Poverty Level	Estimated Population Below Poverty Level Within 0.25 Mile Buffer	Estimated Population Below Poverty Level Within 0.5 Mile Buffer
Ashburnham	430	7.18%	0	0
Ashby	119	3.98%	0	0
Athol	1,233	10.88%	99	196
Ayer	917	12.79%	19	76
Bolton	131	2.72%	0	0
Boxborough	239	4.82%	0	0
Clinton	1,298	9.69%	0	0
Fitchburg	7,198	18.95%	2,210	3,474
Gardner	2,217	11.57%	523	911
Groton	313	3.01%	0	0
Hardwick	314	10.82%	0	0
Harvard	275	5.03%	0	0
Hubbardston	494	11.38%	0	0
Lancaster	438	6.76%	5	16
Leominster	3,981	9.82%	1,112	1,769

Westminster	269	3.78%	1	5
Winchendon	933	9.28%	66	134
Region Total	23,948		4,175	6,877
% of Region Total			17.43%	28.71%

Source: U.S. Census Bureau, American Community Survey 5-Year Estimate 2007-2011

Again, those communities with some form of fixed route service have the highest percentage of coverage for those below the poverty level. Overall, 17 to 29 percent of this particular target population are within 0.25 or 0.50 miles of service.

C. Elderly Individuals - Target Populations vs Transit Services

The following table lists the MRPC and MART communities and the estimated target population of elderly individuals that are within the 0.25 and 0.5 mile buffers established around existing transit services.

Population over 65 by Community				
Community	Total Population over 65	% of Total Population over 65	Estimated Population Over 65 Within 0.25 Mile Buffer	Estimated Population Over 65 Within 0.5 Mile Buffer
Ashburnham	595	9.78%	0	0
Ashby	323	10.51%	0	0
Athol	1763	15.22%	142	281

% of Region Total			17.80%	29.00%

Source: U.S. Census Bureau, 2010 Summary File 1

Fitchburg and Leominster have the highest percent of minority population within the buffer zones analyzed. Overall, the percent of the MRPC and MART regions minority populations within 0.25 and 0.50 miles of established fixed route service is from 18% to 29%, respectively.

5. Gaps, Needs and Comments

As part of the development of gaps and needs in transit service as it relates to the identified target populations, various studies and assessments conducted by the MRPC and other organizations were reviewed. The North Central Regional Coordinating Council (RCC) and its members provided the MRPC with information related to transit services for their particular clientele. This section attempts to summarize information from these sources as they relate to gaps and needs.

A. Fitchburg/Leominster and Gardner Transit Development Plans (TDP)

The MRPC has conducted on a regular basis for MART Transit Development Plans for the existing fixed route services in Fitchburg, Leominster and Gardner. As part of this plan development, a survey is conducted of riders to assess the services available, determine user impressions and to identify additional needs. The latest passenger surveys done in mid-2013 (Summer) and early 2014 (Winter) were also done in Spanish in order to solicit input from other populations that utilize the system. Two open ended questions in the survey asked respondents their feelings and opinions regarding service expansion and overall comments on the system. The comments received were grouped into four general categories: Extended Weekend Hours and/or Sunday Service; Later Hours of Operation for Weekday Service Including 2nd and 3rd Shift Hours; Service Issues (i.e. passenger congestion, schedule comprehension, timeliness, etc.); and Route Expansion within the cities or with other communities. One question sought the user's opinion on five overall levels of service categories.

The following summarizes survey responses received regarding the current fixed route system.

Within the survey, questions 23 and 25 asked respectively “Do you feel expanded bus service is needed? If yes, in what neighborhood?” and “Do you have any comments or suggestions regarding bus service.” Some 600 to 700 responses were recorded to these survey questions. The results are summarized in the following tables.

Q23 - Do you feel expanded bus service is needed? If yes, in what neighborhood?	Sunday/Weekend Service	Later Hrs/2nd & 3rd Shift Hrs	Service Issues	Route Expansion	Total Responses
Winter	50	61	20	112	544
Summer	27	10	2	20	129
Winter Spanish	0	0	0	3	15
Summer Spanish	3	1	1	0	12
Totals	80	72	23	135	700
Percentage	11.43%	10.29%	3.29%	19.29%	

Q25 - Do you have any comments or suggestions regarding bus service?	Sunday/Weekend Service	Later Hrs/2nd & 3rd Shift Hrs	Service Issues	Route Expansion	Total Responses
Winter	68	78	77	26	495
Summer	30	18	14	2	105
Winter Spanish	1	0	1	0	13
Summer Spanish	6	3	0	0	11
Totals	105	99	92	28	624
Percentage	16.83%	15.87%	14.74%	4.49%	

Based upon these responses the following gaps, needs and issues were identified.

- Expand weekday operating hours to accommodate working individuals both at night and in the early morning.
- Expand Saturday operating hours for employment and shopping activities.
- Initiate Sunday service to shopping and cultural centers, etc.
- Expand service routes, frequency and hours of operation to existing shopping centers and residential neighborhoods.
- Expand service between Fitchburg, Leominster, Gardner and neighboring communities.
- Expand service to Worcester.
- Expand service to Fitchburg Airport industrial area, Route 117 area, and assisted living facilities and nursing homes.
- Adjust service frequency and times to Mount Wachusett Community College and Fitchburg State University to accommodate students
- Adjust routes and times to accommodate high school hours of operation
- Review transfer procedures and policies to eliminate confusion and mistakes as well as assist riders.
- Improve on time operation to assist individuals on medical trips.
- Improve service connections and times to commuter rail stations to align with trains.
- Improve marketing and outreach to public regarding services, schedules, routes and policies.
- Examine/institute web access for bus routes and schedules.
- Institute bus tracking applications for users to monitor bus times and locations.
- Simplify existing bus schedules.
- Conduct/provide training for users on how to read and follow bus schedules.
- Review Spanish language schedules and instructions throughout system.

Question 24 of the survey asked respondents their overall impression of the fixed route service on five points from timing to fares. User results would indicate an overall general favorable impression of the MART fixed route system in Fitchburg/Leominster and Gardner.

Q24 - Based on your experience, do you agree, disagree, or have no opinion on the following statements?	All Surveys			
	Agree	Disagree	No Opinion	Response Count
Bus usually arrives on schedule	64.5%	29.2%	6.2%	1252
Fare is reasonable	90.1%	5.1%	4.8%	1205
Service is Reliable	78.6%	13.4%	8.0%	1195
Frequency of service is adequate	68.4%	21.7%	9.8%	1178
Schedule/route information is readily available	83.7%	9.8%	6.5%	1193

B. 2012 Montachusett Regional Transportation Plan

In August of 2011, the Montachusett MPO formally endorsed the 2012 Montachusett Regional Transportation Plan (RTP). As part of the outreach effort for the RTP, the MRPC conducted a series of public meetings and events to solicit comments and input. From these activities, comments were received on various transportation related topics from infrastructure to transit. Please refer to the complete 2012 RTP (available online at www.mrpc.org) for a complete synopsis of comments received. The following identified needs and issues from the 2012 RTP are related to transit services.

Fixed Route Services

- Rate of frequency, timings and connections within neighborhoods in Fitchburg and Leominster.
- Consistency of funding for services.
- Demand for fixed route services to additional communities and Devens.
- Establishment of commuter rail shuttle services.

Paratransit Services

- Coordinate and promote councils-on-aging (COA's) van service for disabled individuals in communities.
- Promote changes to COA policies in order to expand services to meet other community needs.
- Expand COA van services to operate on weekends and nights.
- Expand COA van services to commuter rail shuttles and job access.
- Expand MART van utilization within member communities for paratransit service.
- Seek funding resources to maintain and expand operations.
- Improve outreach and information dissemination regarding veteran services that are available.

Overall Transit Recommendations and Needs

- Continued monitoring of routes and schedules so that any beneficial changes can be identified and implemented;
- Alternative sources of funding for continued transit operations must be developed and instituted;
- The marketing effort must be upgraded and increased to inform the public of transit availability and efficiency;
- Additional equipment such as ITS equipment, lift equipped buses, lift equipped vans, etc., should be acquired;
- Driver safety, CPR, first aid, and sensitivity courses should be maintained;
- Transit services for the elderly and disabled should continue to be upgraded as necessary to insure both availability and accessibility in compliance with MART's ADA complementary paratransit plan;
- Paratransit services provided by MART to social service agency clients should continue to be monitored for coordination of effort;
- Brokerage programs thru the Executive Office of Health & Human Services' (EOHHS) Human Service Transportation (HST) Office, and local school districts, should be monitored for greater coordination and continued use of private enterprises.

C. North Central Regional Coordinating Council (RCC) Record of Area Needs-Assessments

In April of 2011, Gov. Deval Patrick signed Executive Order 530 that established a Commission to develop recommendations to maximize “efficiencies in the provision of these critical services utilized by persons with disabilities, persons with low incomes, persons with Limited English Proficiency, and seniors and visitors to the Commonwealth.” (www.mbta.com)

One recommendation was the formation of Regional Coordinating Councils (RCCs) that “address paratransit and community transportation service gaps and recommendations ... at the local level.” In the Montachusett and MART regions, this is done by the North Central RCC. (<http://www.massdot.state.ma.us/>)

The RCC has compiled and reviewed several needs assessments conducted by its members and provided to the MRPC a summary report detailing the findings. The following are derived from the RCC review report.

Elder Needs in Central Massachusetts – Central MA Agency on Aging

- Transportation – Little availability in some areas. Remains one of top unmet needs in region based on needs assessment surveys from 1997 on.
- Little access to public transportation.
- Little or no taxi service.
- Local bus service rare or non-existent.
- Reliance on transportation programs operated by local volunteer organizations.
- Distance from service providers a barrier to care.
- Area service providers that do not accept Medicare patients.
- Access to prescriptions.
- Cost of providing service a major obstacle to addressing issues.
- Increase in senior participation in the labor indicates that employment access and issues are now also a senior issue.

Central MA Agency on Aging (CMAA) Area Plan 2014-2017

- Funding Priorities: Medical Transportation - in areas where significant unmet need is clearly demonstrated. Proposals should include service to residents in more than one community whose residents would otherwise not have access to medical transportation and/or escorted transportation where necessary to access health care.
- Work with interested local COAs and other organizations on implementation based on information and models identified by CMAA.

Community Health Assessment of North Central MA

- Lack and cost of transportation. Limitations of the public transportation system including limited schedules and routes resulting in trips in inclement weather, access to appointments and out of town specialists.

Montachusett Opportunity Council, Inc. (MOC) Community Action Plan 2015-2017

“A community needs assessment was recently carried out by MOC. They sent surveys to three groups – Community members, Staff, and MOC Clients. In addition, Stakeholders were identified and interviewed as a comparison to the surveyed groups, and they also conducted focus groups. Transportation was in the top four needs (out of 10) for every group of stakeholders that received the survey. Individual concerns relating to the cost of transportation, access to public transportation, and community walkability were also highlighted by the survey. Transportation also emerged as a top concern among focus group respondents.” (MOC Inc Community Action Plan)

- Lack of an affordable, comprehensive public transportation system throughout the Montachusett Region creates a significant barrier to residents in accessing employment and needed services.
- The greatest single need in the region is for out of town transportation to medical appointments and work sites for the disabled and low income.

Wachusett Smart Growth Corridor Analysis – Focus Group

In late 2012, the MRPC held a Spanish Focus Group meeting at the Cleghorn Neighborhood Center (CNC) in Fitchburg as part of their work on a HUD Challenge Grant for the Wachusett Smart Growth Corridor Analysis. This Corridor Plan was in response to the development of the new commuter rail line station in West Fitchburg known as Wachusett Station. The group discussed various issues including what changes might be necessary to the transportation system. Responses included the following:

- The public transportation system must be improved to include:
 - Schedules and guidance to the community as the current information system cannot be understood;
 - Transportation 7 days a week;
 - Expand service until 11:00pm on weekdays and weekends 12:00 am;
 - Extend the current schedule based on seasonal changes: i.e. summer, autumn, winter;
 - Reduce system running time to every 30 minutes;
- Improved Intra-city travel to the station.
- Additional marketing campaign to promote public transportation;
 - More information on transportation alternatives available;
 - Information showing population the benefits of using public transportation;
 - Create a marketing campaign since the population is un-informed;
- Establish taxi services only to the station and create a more personalized taxi service;
- Coordinate the new station schedules with the current transportation system and taxis.

Transit Charette

In June of 2013, the MRPC and the Joint Coalition on Health (JCOH) held a charrette on transit and its service and needs as it relates to health initiatives in the region. From this charrette a number of “barriers” were identified.

- Limited connections;
- Cost;
- Access;
- Lack of awareness;
- Limited routes and schedules;
- Lack of bicycle racks;
- Signage/Language barriers;

2008 Coordinated Public Transit – Human Services Plan

The 2008 Coordinated Plan identified the following needs as part of its analysis. These still align with information derived for this update.

- Expansion of services to meet varying employment hours and locations. Third shift workers in the industrial areas and parks have no option to utilize transit;
- Expanded service to commercial and medical facilities;
- Service connections from rural communities to facilities in larger urban area;
- Service to medical, employment and commercial facilities in the rural communities for the target populations;
- Expansion of services on weekends and at night;
- Improved commuter rail options through more and faster service as well as reverse commute;
- Coordination of services with the commuter rail system.

6. Priorities and Recommendations

Based upon the issues identified during the development of this Coordinated Public Transit - Human Services Plan, a series of priorities and recommendations can be established. Please note that the priorities and recommendations listed are not intended to be all-inclusive. It is assumed that additional needs, gaps and priorities will be identified and established through further iterations of this plan.

In general, priorities determined through this Plan can be summarized as follows:

A. Extension of Existing Fixed Route Service Hours and Days of Operation.

1. Extend/Expand Transit Services

MART and other RTAs should continue to explore options to expand existing routes, service areas and hours and days of operation. Many of the responses to the needs question highlighted in this Plan have indicated a desire to see service expanded both in terms of hours and days of operation. Expansion of service hours are seen as important to those individuals employed, or seeking employment, during non-typical work hours, i.e. late night, weekends, etc. Expanded service will also benefit those seeking to access colleges, employment training centers and commercial activities.

Recommendation: Seek funding and alternative sources to extend and expand the days and hours of operation for current fixed route and paratransit services. This includes extended daily hours of operation, establishment of Sunday service, refinements and expansion of routes to employment training centers, commercial malls/areas, industrial parks, etc.

2. Sustain Existing Services and Maintenance of Vehicles

Given the uncertain nature of operating and capital funding for transit services, it is important to continue to maintain the existing system and its fleet. The importance of the current services is demonstrated by the ridership figures and the survey responses that indicate the reliance a number of individuals have on the system. These services are important to the target populations as other means of transport are often limited and scarce. Every effort should be made in order maintain, at least, the current level of operation. In particular, the focus should be on ensuring the continuation of MART, Council on Aging vans, and paratransit services.

Recommendation: Public transportation providers should seek to maintain current funds for operations and services and repair or replace vehicles as needed. JARC and New Freedom types of activities and MAP funding should be maintained and expanded to address the identified needs and services.

B. Medical Transportation Service in Both the Fixed Route Areas and In the Rural Communities.

1. Seek to Extend Medical Services to Rural Communities

The lack of a reliable or consistent service to assist elderly, disabled and low income individuals in the more rural communities of the region was a consistent point of concern. Often individuals are unaware of transit options through MART, their COA, etc. and consequently may suffer unnecessarily. Expansion of information on the availability of these services, clarification with COA's on their roles and what can be done with their vans can address some of these concerns. Expansion of services through additional funding and resources should also be sought where appropriate.

Recommendation: Improve the dissemination of information related to current services by MART, RTAs, taxi companies, COA's, etc. to rural communities. Improvements to appropriate websites for MART and the communities regarding available services are strongly recommended. Non-traditional services such as web based ride sharing may also prove beneficial.

C. Expansion and Connection of Fixed Route Service to Additional Communities

Several comments related to the current fixed route services not only indicated a desire for expanded hours of operation but also to additional locations and communities. Linkages to communities such as Lunenburg, Shirley, Devens, Westminster, Clinton and Worcester are often mentioned as a need by respondents. An expansion of routes into other communities will allow for additional access to services, medical and otherwise, that reside in the more urban communities of Fitchburg, Leominster and Gardner. Residents of the more rural communities would thus see an increase in opportunities for employment, education, work and shopping.

Recommendation: Seek funding and alternative sources to extend and expand fixed route and paratransit services to other communities around Fitchburg, Leominster and Gardner. Route expansion should include linkages to commercial, employment, medical and cultural centers.

D. Education and Training of Available Services

1. Expand Outreach and Training of Transit Services to Target and LEP Populations

Several comments were received on the need to educate individuals on the fixed route and paratransit services available in the region. RTAs should examine the establishment of training material and resources for the target populations of this plan as well as to those with Limited English Proficiency (LEP). These education and outreach services should include the councils-on-aging as they are often the initial contact for many of the individuals covered in this plan.

Recommendation: Seek to develop targeted training resources for the target populations as well as those in the LEP communities. Materials could include training workshops at various neighborhood centers, a train the trainer seminar, web based videos, and alternative language information. Outreach should be provided to all social service agencies linked to MART as well as through newspaper campaigns through articles/advertisements, radio advertising and promotional marketing. In addition, several comments made reference to smartphone apps related to schedule availability, system text alerts and real time bus/vehicle tracking. Development and implementation of such technology should be explored and implemented with appropriate funding.

E. Other Areas of Emphasis

Based upon the information developed, the following are additional priority areas that more general in nature but are no less important.

1. Encourage Employer Vanpools

Employer vanpool options should be encouraged for businesses in the Montachusett Region. Some employers have had success with these services and it would decrease the burden placed on other public transportation services. In addition, connections between existing transit services and vanpool routes can be coordinated to enhance both public and private entities.

Recommendation: Identify and encourage employer based vanpool options as well as connections to existing services.

2. Expand and Increase Commuter Rail Options

Connections with existing services to commuter rail stations should be examined, expanded and improved as necessary. Commuter rail expansion and improvement in the region also provide the target populations with more options for medical, employment and shopping. As such, coordination between existing transit services and the commuter rail stations and schedules would enhance opportunities.

Recommendation: Seek to improve and expand connections and coordination between transit services and the commuter rail stations in the region. Expansion options should address areas such as reverse commute, service frequency, and rail line extension. Both fixed route and demand responsive services should be examined if funding is available.

3. Explore Additional Funding Options

Limited funding and resources is a barrier to meeting the needs of the target populations. Funding is particularly important for RTAs. Continued efforts to identify and seek out additional funding sources would help to implement service expansion and improvement.

Recommendation: Continue all efforts to seek out additional funds to assist in the support and expansion of the various transit systems in the region.

4. Explore Fare Options to Encourage Additional Commuter Rail Ridership

Current fare pricing along the commuter rail system may contribute to ridership issues. Comments received on this report stated that due to the high cost of rail passes from Zone 1A (urban core), several employer supported shuttles run to Alewife Station. To encourage reverse commute ridership, a discounted pass option should be considered by the MBTA. The Montachusett MPO supported this comment and its inclusion as a recommendation.

Recommendation: Encourage the MBTA to review commuter rail fare options, in particular as they relate to reverse commute, to determine potential discounts for users to promote additional ridership and access to this region and its employers.

5. Explore Additional Scheduling Methods for the Disabled and Target Populations

Comments received supported the valuable service provided to the disabled and targeted populations by local providers. However, it was mentioned that the available scheduling methods for the disabled clientele can be difficult and can require assistance on the individuals end. It was recommended that an electronic or computerized, i.e. email, type of system would be beneficial to all users, especially those with any type of speech impediment.

Recommendation: Encourage local providers and MART to investigate the possible establishment of a more automated scheduling or “booking” system for individuals to utilize. This would assist those persons with a communication limitation or challenge.

Appendix A – Facilities

Elderly Facilities

Facility Type	Facility Name	Address	Community
Elderly Housing	Ashley Court Apartments	27 School Street	Ashburnham
Assisted Living	Applewood Home for Elders	171 S. Royalston Road	Athol
Assisted Living	Providence Cliff Senior Residence	648 Pleasant Street	Athol
Elderly Housing	Pequoig Apartments	416 Main Street	Athol

Appendix C – Comments and Responses

Comment	Response
1. Comment letter from the Devens Enterprise Commission indicating a need for “shuttles to connect this employment center to commuter rail...” and support for the Commuter Rail Recommendations; collaborative efforts to address...mobility; and the recommendations categorized as other areas of emphasis.	1. Comment and support noted.
2. Comment email from the Administrative Coordinator for the Town of Petersham regarding services for eligible town residents.	2. Comment noted. Additional information provided to town and MART to initiate discussions regarding potential services.
3. Comment letter from CrossTown Connect indicating support for the plan and the need to target resources toward people “for whom English is not their first language.” In addition, they indicate a major need for more reverse commute options and the potential role that the MMPO could play in pursuing the establishment of discounted Reverse Commuter passes with the commuter rail.	3. Comment and support noted. Concept of discounted commuter rail passes related to reverse commute as a way to encourage use forwarded to MMPO for discussion. Recommendation added to report regarding fare discounts based on MPO decision.
4. Comment via phone from Paula Bertram of Lunenburg regarding tables listed on pages 37 to 41. Issue related to columns labelled “% w/in 0.25 Mile Buffer” and “% w/in 0.5 Mile Buffer”. Percentages did not appear to correspond to population estimates listed in last two columns of the tables.	6. Comment noted. Discussions with GIS department indicate that these two columns indicate the same assumed even distribution of that segment of the population as calculated for the entire community. They do not indicate the actual percentage calculated for the buffer zone. The last two columns do provide the estimated population within the buffers as calculated by the analysis software. To remove confusion, the two columns labeled “% w/in 0.25 Mile Buffer” and “% w/in 0.5 Mile Buffer” should be removed from the tables.
5. Comment letter from Ashburnham town resident regarding experiences with services for disabled as well as a question regarding the method to define the buffer zones around transit services. Also provided a comment regarding the phone method to schedule a Dial a Ride service for her daughter due to daughter’s speech impairment. Expressed desire to see if a computerized or email schedule system could be examined.	5. Comment noted. Question related to buffer zones relayed to indicate that 0.25 and 0.5 mile limits are straight line measurements around identified transit routes. Additional comments forwarded to MART for their review and consideration. Recommendation added for the investigation of electronic/email based scheduling by MART based upon MPO decision.
6. Comment letter from the town of Lunenburg indicating support for the recommendation to expand transit services to communities neighboring Fitchburg and Leominster and they urge consideration for expansion into Lunenburg. In addition, they highlight the growing need for services for the target populations within the town. The issue related to the tables regarding population within the buffer zones is also highlighted.	6. Comment is noted. The tables will be corrected as indicated in response no. 4. Service issue concerns forwarded to MART for consideration.
7. Comment email from MART indicating corrections, clarifications and revisions to the main text of the report. No changes were made to the recommendations and priorities.	7. Comments noted and corrections made to report as indicated.
